Chevy Big Block Engine Casting Codes - Chevy-Camaro

IG - 396/325HP engine with Powerglide transmission R - Rochester carburetor (Carb designation used only in 66) 6Y204760 - partial VIN# from a fullsize Chevy built at Wilmington, DE. From 1964-1967, the partial VIN# on the block was stamped on all engines with at least 300HP. In 1968, all V8's had the partial VIN# stamped on the block.

Drivetrain Decoding

Look for the engine identification stamp on the block, just above the timing chain cover. If the stamp is present and contains one of the following sequences of numbers, it is a 396 big-block engine: 3855061, 3855961, 3855962, 3866961, 3873858, 3902406, 3902466, 3916323, 3935440, 3955272, 3965440, 3965449, 3965540, or 3969854.

How to Identify a 396 Big Block | It Still Runs

This example happens to be a September 22-built 1970 396 engine with a TH400 transmission as noted by the CTW suffix code. The plant, date, and engine ID codes were stamped at the respective engine assembly plants while the partial VINs (when applicable) were stamped at the final assembly plant.

Engine Stamping Numbers

When it came to choosing a big block engine in the Chevelle, the 396 was still the only engine of choice. Be it good or bad, 1967 saw some revisions made to the 396ci engine lineup. The base 396ci engine (RPO L35), still boasted 325 horsepower, and still used a cast-iron intake manifold with a single Quadrajet carburetor.

Chevelle Engine Options: 1967 - Chevy Hardcore

Engine identification may be determined by finding the engine block VIN and the engine application code in the following tables. On 4- and 6-cylinder engines, the code is stamped on a pad on the passenger side of the block to the rear of the distributor and above the fuel pump. V8 engine codes are stamped on a pad forward of the cylinder head on the passenger side of the block.
