Im really not worried so much as if its enough engine as I am worried about the reliability of the engine. I had a 19.5' larsen cuddy with the 3.0l and it would top out at 39mph per GPS. The 3.0l was rated for 130hp IIRC and isnt the 3.7l rated for 180hp? Thats about the same as a carb'd 4.3 isnt it?
