### A Chinese Biogas Manual Popularising

It is interesting that the Chinese use biogas much more than we do in America. Since 1950 China has experimented with biogas from agricultural wastes. This is a practice based upon age old Chinese tradition. The Chinese compost human, animal and plant wastes to produce an organic fertilizer of high quality.

A closer examination of Fig. 1(b) showed that at about day 15 there was a pseudo-plateau followed by a further increase in the production of methane. This was typical of the mixes which contained molasses. It is suggested that the initial production of methane was the result of the degradation of the molasses component and that the secondary biogas production resulted from the degradation of ...
