Preface. As chair of the Steering Committee of the Consortium for Spinal Cord Medicine, it is a distinct pleasure for me to introduce our 10th clinical practice guideline, Early Acute Management in Adults with Spinal Cord Injury. This guideline was developed by an expert panel encompassing the myriad disciplines that care for a person from the time of injury through the critical first few days.

Early Acute Management in Adults with Spinal Cord Injury

Older adults use far more health care services than do younger groups. Although older adults vary greatly in terms of health status, the majority of them have at least one chronic condition that requires care. Older adults also vary in their demographic characteristics, which leads to differences in their demand for and utilization of health services. Projections of the utilization of health ...
