artificial neural network, called a "Siamese" neural network. This network consists of two identical sub-networks joined at their out puts. During training the two sub-networks extract features from two signatures, while the joining neuron measures the distance be tween the two feature vectors. Verification consists of comparing an extracted feature vector --ith a stored feature vector for ...

AlphaZero won or drew all 100 games, according to a non-peer-reviewed research paper published with Cornell University Library's arXiv. "Starting from random play, and given no domain ...

AlphaZero AI beats champion chess program after teaching itself in four ...

In similar work, Chen et al. introduced the use of the rotational sampling spectrum (RSS) of wind speed, which was used in fatigue life estimation of 5-MW blades. The proposed method employed an explicit analytical expression of the RSS based on the transfer mechanism of fluctuating kinetic energy in the frequency domain. From the simulation results, the RSS was related to the rotor speed and ...

But recent advances in information technology threaten privacy and have reduced the amount of control over personal data and open up the possibility of a range of negative consequences as a result of access to personal data. In the second half of the 20 th century data protection regimes have been put in place as a response to increasing levels of processing of personal data. The 21 st century ...

1. Introduction. Artificial Intelligence (AI) lies at the core of many activity sectors that have embraced new information technologies .While the roots of AI trace back to several decades ago, there is a clear consensus on the paramount importance featured nowadays by intelligent machines endowed with learning, reasoning and adaptation capabilities.

Explainable Artificial Intelligence (XAI): Concepts, taxonomies ...

Artificial intelligence (AI) is the use of "computers and machines to mimic the problem-solving and decision-making capabilities of the human mind," according to IBM. []The idea of AI goes back at least 2,700 years. As Adrienne Mayor, research scholar, folklorist, and science historian at Stanford University, explained: "Our ability to imagine artificial intelligence goes back to the ...

The Canadian government recently introduced the Digital Charter Implementation Act, 2022 (the Act), a bill designed to bolster Canada's privacy and data protection legal framework and regulate artificial intelligence (AI) systems.The Act expands upon its predecessor draft bill introduced in 2020 and is comprised of three proposed statutes:

Proposed Canadian Legislation Seeks To Strengthen Data ... - Mondaq

The label does not have to state where it comes from. A flavouring only counts as fully 'artificial' if it does not occur in nature at all, as is the case with another, stronger vanilla-substitute called ethyl-vanillin (often used in chocolate). (p. 257) If you have not introduced the quotation in the sentence before, then you would follow the quotation with full details of the citation ...
