Agile requirements are a product owner's best friend. Product owners who don't use agile requirements get caught up with spec'ing out every detail to deliver the right software (then cross their fingers hoping they've spec'ed out the right things).

Creating a lean, mean product requirements machine

In Agile methodology, however, the entire set of requirements is broken into smaller pieces of works (tasks) which can be completed in shorter cycles. The requirements are mostly defined in the format of stories that are written from the perspective of the user (for whom) with expectations (what) and intended benefits (why and its value).
