Polygynous mating systems with group fidelity are a common animal organization, typically consisting of multiple females in a mated group with a single male for an extended period (sometimes referred to as harem polygyny). Single-male polygyny with reproductive fidelity occurs in invertebrates, bony fishes, and some tetrapods, such as lizards, mammals, and birds. In amphibians, reproductive ...

If there are two authors for a particular reference, cite the names in the order in which they appear e.g. (Smith & Green 1998). If there are more than two authors of a cited reference, use et al. e.g. (Platt et al. 2004). When referring to two or more texts by different authors, separate them with a semicolon (;) e.g. (Smith 1995; Green 1992).

A colt is a male horse, usually below the age of four years.. Description. The term "colt" only describes young male horses and is not to be confused with foal, which is a horse of either sex less than one year of age.Similarly, a yearling is a horse of either sex between the ages of one and two. A young female horse is called a filly, and a mare once she is an adult animal.

Distraction display has been most extensively studied in birds. It has been observed in many species, including passerines and non-passerines, and has been particularly well documented in the Charadriiformes.. Injury-feigning, including broken-wing and impeded flight displays, is one of the more common forms of distraction. In broken-wing displays, birds that are at the nest walk away from it ...
