Atherothrombosis

Coronary artery disease (CAD) and acute myocardial infarction (AMI) are inflammatory pathologies, involving interleukins (ILs), such as IL-1 β , IL-6 and tumor necrosis factor (TNF)- α , and acute phase proteins production, such as for C reactive protein (CRP). The process begins with retention of low-d ...

**Pathophysiology,
and ... Disease**

Coronary artery disease (CAD) is a cardiovascular disorder occurring due to the build-up of plaque in the arteries of the heart that causes reduction in the blood flow to the heart muscle. Stable and unstable angina, and myocardial infarction are forms of coronary artery disease. Chest pain that travels to the
