8. Press "Autopilot Interrupt" switch on pilot's control wheel and rotate control wheel to check for servo disengagement. Release switch - servo should re-engage. 9. Begin taxi with Century 1 ON - Century 1 should cause a control wheel deflection opposite to the direction of the turn. This completes the ground check portion.

Ground and Flight Checks Century 1 and Tracker PRE-FLIGHT

The Piper AutoFlite II became the Century 1. This is the only dedicated* single-axis, rate-based autopilot still available from Century and it maintains the same capability—it offers roll axis only with tracking, but no heading hold. The lack of heading hold makes this a less desirable option, unless you never find yourself being vectored in ...
