## 25 Water

Where and in what forms is water available on Earth? The world's water exists naturally in different forms and locations: in the air, on the surface, below the ground, and in the oceans.

Freshwater accounts for only 2.5% of the Earth's water, and most of it is frozen in glaciers and icecaps.

### 25. Water

This massive quantity of water is hard to visualize: the total water resources of the earth equal roughly 326 million cubic miles, with each cubic mile equal to around 1 trillion gallons of water. To imagine just one trillion gallons of water, try to picture 40 million swimming pools, or 24 billion baths.
