Construction Job Hazard Analysis Form

A job hazard analysis (JHA), also called a job safety analysis (JSA), is a technique to identify the dangers of specific tasks in order to reduce the risk of injury to workers. Why is a JHA important? Once you know what the hazards are, you can reduce or eliminate them before anyone gets hurt. The JHA can also be used to investigate accidents and to train workers how to do their jobs safely ...

What is Underwater Welding | Hazard | Job | Salary ...

A hazard is a potential source of harm. Substances, events, or circumstances can constitute hazards when their nature would allow them, even just theoretically, to cause damage to health, life, property, or any other interest of value. The probability of that harm being realized in a specific incident, combined with the magnitude of potential harm, make up its risk, a term often used ...
