This is the first English translation, from the original German of 1838, of the first textbook of plastic surgery. Its author, a practicing surgeon who actually introduced the term 'plastic surgery,' was also the first historian of the field. He included a detailed review of all the literature of his time as well as of the early history of reconstructive operations, extending back to the fifteenth century in Europe, and earlier in India. In addition to its interest as a historical document, this work is an early example of medical specialization, which the author viewed as a progressive force that could be encouraged by collecting relevant background material and presenting it along with practical instruction in a single volume. Medical historians and those with an interest in the early development of plastic surgery will value this fascinating account

Master a complete roadmap for emerging market business success and profitability! Emerging markets are generating unprecedented opportunities, but they are far more complex and risky than they may seem. Profiting in these markets entails retooling business models, products, and strategies to exploit these differences, instead of falling victim to them. Too many American, European and Japanese companies continue to operate with a "developed world" mentality that seeks to merely adapt existing products and strategies, while underestimating the unique challenges of managing a business in radically different contexts. Operating in Emerging Markets draws from real-life examples and today's most valuable research to offer a step-by-step blueprint for improving profitability in emerging markets. Pioneering researchers Dr. Luciano Ciravegna and Dr. Robert Fitzgerald walk you through understanding the true risks and challenges; identifying and investing the right resources; developing the right strategies, products, and processes; and learning from both the successes and failures that have come before you. An indispensable resource for all decision-makers in companies that are (or plan to) operating in emerging markets; and for all graduate business students who may do so in the future. "Publications devoted to rapidly transforming economies are on the rise, but the contribution is often marginal. This new book, Operating in Emerging Markets, authored by Luciano Ciravegna, Robert Fitzgerald, and Sumit Kundu, is an exception. It provides valuable insights into what makes these economies grow and prosper. Most importantly, it responds to the need for practical approaches to tapping emerging markets. Thus it should assist current and future managers in navigating these high-potential but high-risk countries." --S. Tamer Cavusgil, Callaway Professorial Chair and Executive Director, CIBER, J. Mack Robinson College of Business, Georgia State University

Rudolf II, king of Bohemia and Holy Roman Emperor, is paranoid, spendthrift, and wayward. In sixteenth-century Prague, seat of Christendom, he rules over an empty treasury and a court of parasites and schemers. Meanwhile in the ghetto, the Great Rabbi, mystic and seer, guides his people in the uneasy cohabitation of Jew and Christian, while the fabulously wealthy financier Mordechai Meisl has a hand in transactions across Europe and is reputed to be sustaining the treasury. His beautiful wife, Esther, forms a link of a different sort between the castle and the ghetto: by night under the stone bridge, she and the emperor entwine in their dreams under the guise of a white rosemary bush and a red rose. Only by severing the two plants can the Great Rabbi break the spell of forbidden love and deliver the city from the wrath of God. Perutz brings Old Prague to life with a cast of characters ranging from alchemists to the angel Asael, and including the likes of Johannes Kepler and the outlaw prince Wallenstein.

In the early twenty-first century, courts have become versatile actors in the governance of many constitutional democracies, and judges play a variety of roles in politics and policy making. Assembling papers penned by academic specialists on high courts around the world, and presented during a year-long Andrew W. Mellon Foundation John E. Sawyer Seminar at the University of California, Berkeley, this volume maps the roles in governance that courts are undertaking and the ways they have come to matter in the political life of their nations. It offers empirically rich accounts of dramatic judicial actions in the Americas, Europe, the Middle East and Asia, exploring the political conditions and judicial strategies that have fostered those assertions of power and evaluating when and how courts' performance of new roles has been politically consequential. By focusing on the content and consequences of judicial power, the book advances a new agenda for the comparative study of courts.
