'Deep inside the grotto of my childhood innocence was a rational adult preparing to murder the sentry of youth'. The Moss Wall is a story of a ten year old boy told by his adult self. The boy is victimised at school by the headmaster and most of his fellow pupils. He endures beatings, humiliation and taunts that teaches him hatred and revenge. When the local School Inspector threatens his mother, he is pushed to the edge and plans a calculated attack. What emerges from this novella, is a story of love and hate, of mythical spirits and shadows of people who have sufferings far greater than his own. Enter the world of a ten year old boy in 1974 Northern Ireland and observe the innocence of logic and the subconscious reflection of a country bleeding to death.

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

transmissions; and provides the latest information on computer module glitches.

Today's corporate deal makers face a conundrum: Though 70% of major acquisitions fail, it's nearly impossible to build a world-class company without doing deals. In *Mastering the Merger*, David Harding and Sam Rovit argue that a laserlike focus on just four key imperatives--before executives finalize the deal--can dramatically improve the odds of M&A success. Based on more than 30 years of in-the-trenches work on thousands of deals across a range of industries--and supplemented by extensive Bain & Co. research--Harding and Rovit reveal that the best M&A performers channel their efforts into (1) targeting deals that advance the core business; (2) determining which deals to close and when to walk away; (3) identifying where to integrate--and where not to; and (4) developing contingency plans for when deals inevitably stray. Top deal makers also favor a succession of smaller deals over complex "megamergers"--and essentially institutionalize a success formula over time. Helping executives zero in on what matters most in the complex world of M&A, *Mastering the Merger* offers a blueprint for the decisions and strategies that will beat the odds.

For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new *Lemon-Aid Used Cars and Trucks 2012-2013* has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
