

## 2017 Equipment Leasing And Finance Association

Over the last few decades, many countries have reformed their secured transactions law. One of the main reasons has been the clear link between reform and the availability of credit, and the drive to improve access to finance, particularly for micro, small and medium-sized enterprises. This book focuses particularly on developing economies in Africa, which have legal frameworks influenced by English, French, Belgian, Roman-Dutch and other laws. Reform in this area of law across African countries has taken a number of forms, which are explored and discussed in this book. Secured Transactions Law Reform in Africa is a mixture of a critical description of the pre-reform law and practice, and the reform process itself. It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms. The book sets out a road map for the future of secured transactions reform; primarily in Africa, but also in other countries that have undertaken or are contemplating similar reforms. This book is the second in a series of books about Secured Transactions Law in countries around the world, and its reform, both on a national and an international scale. The first book, Secured Transactions Law Reform: Principles, Policies and Practice, was published in 2016.

Consumer (co-)ownership in renewable energy (RE) is essential to the overall success of Energy Transition. In June 2018, the European Union agreed on a corresponding enabling framework as part of a recast of the Renewable Energy Directive (RED II). The transposition of these comprehensive rules – in particular those on local RE communities – requires developing, implementing and rolling out business models that broaden the capital participation of consumers. The challenge is to include municipalities and/or commercial investors like SMEs and advance to economies of scale while retaining the benefits of individual consumer participation. This book is addressed to energy consumers in local communities, their municipalities and to the policy makers who represent them. Additionally, non-EU countries, in particular those where rural areas have limited access to energy, e.g. in Asia, Africa and Latin America, may be interested in the benefits of consumer ownership. While demand for energy in developing countries is growing, access to energy is crucial for improving the quality of life. The editor of this book presents a new model of consumer ownership in RE for both the EU and countries worldwide. Part One describes the rationale for consumer ownership in RE with regard to social, organizational, legal and financial conditions. Part Two discusses the issue of financing RE and introduces a new financing technique, the Consumer Stock Ownership Plan (CSOP), comparing it to traditional models. Part Three provides 18 country studies from Europe, North America, South America and Asia, organized so as to enable a cross-country comparison of policy approaches and feasibility. Policy recommendations are based on the results of this survey. Part Four summarizes, compares the best practice cases, presents a cost-benefit analysis of “prosumage” and against this background evaluates the impact on future policy.

The text's efficient format does not overwhelm students, and its accessible style provides an alternative to more encyclopedic, reference-book approaches. The book offers a blend of the core concepts of accounting principles with procedural applications. This approach is supplemented with the most expansive set of end-of-chapter material on the market, a thorough integration of today's hot topics, and a robust selection of student and instructor print and online resources. The future of clean energy is no longer about science and technology; it's all about access to finance. The fossil fuel industry has been subsidized for decades with tax breaks and government backing, while renewables have struggled to compete. But now clean energy is the safe bet for investors, as is argued in Renewable Energy Finance: Powering the Future, edited by Dr Charles Donovan, Principal Teaching Fellow at Imperial College Business School. With a Foreword writer Lord Brown and contributions from some of the world's leading experts in energy finance, this timely book documents how investors are spending over US\$250 billion each year on new renewable energy projects and positioning themselves in a global investment market that will continue to expand at double-digit growth rates until 2020. It documents first-hand experiences of the challenges of balancing risk and return amid volatile market conditions and rapid shifts in government policy. Renewable Energy Finance provides an insider's perspective on renewable energy transactions, and insight into how countries like the US, India and China are responding to the global energy challenge. Drawing together contributions from senior executives and leading academics, Renewable Energy Finance serves an audience of readers craving intelligent, practical perspectives on the future of clean energy investment. Contents:Section I:Introduction to Renewable Energy Finance (Charles Donovan)The Clean Energy Imperative (Jim Skea)How Much Renewable Energy Will the Global Economy Need? The third edition of Loftus' Financial Reporting has been updated for recent developments in the Australian Accounting Standards, including the release of the new Conceptual Framework. This text is designed to be used across the 2nd and 3rd year financial accounting units. A hallmark feature of the text is that it provides both a conceptual understanding and a practical application of the accounting standards. For students, an understanding of the conceptual basis of accounting and the rationale behind the principles is crucial to the consistent application of standards in a variety of practical contexts. The Financial Reporting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos (from Ernst & Young), interactive worked problems and questions with immediate feedback. Loftus' unique resource can also form the basis of a blended learning solution for lecturers.

This book is a guidebook for any business, small to large, considering acquiring equipment through a leasing alternative. It explains the pros and cons of leasing equipment, as well as how leasing and financing companies operate and the pitfalls to watch out for, provides guidance on how to financially evaluate lease offers and compare them to other financing alternatives. It also discusses the various business, accounting, and tax implications. Included are practical tips, recommendations and strategies for getting the best lease deal, a legal and business explanation of all relevant documents, and strategies to negotiate the relevant documents to get the best terms. Very simply, this book is a comprehensive guidebook tailored expressly for the business

lessee--with up-to-date suggestions, insider tips and observations. So, if you're thinking about leasing equipment and want to know how to negotiate the best possible lease deal, this book is for you.

This book is a great desk reference for the practitioner trying to understand and navigate their way through Article 9 of the U.C.C., to close transactions and most importantly, properly perfect and assure priority of their liens in secured transactions. The book is structured, first and foremost, to help the reader easily determine the type of collateral they are dealing with and then how to perfect in such collateral, including more than 50 different types of collateral. The book also includes an extensive section on how to properly perfect liens by filing a financing statement, as well as sections on how to perfect liens through possession and control. The book still further includes extensive sections on the scope of Article 9, important concepts of Article 9, priority of liens and the intersection of Article 9 and the United States Bankruptcy Code and fraudulent conveyance laws.

International Financial Reporting Standards: A Framework-based Perspective links broad concepts and general accounting principles to the specific requirements of IFRS to help students develop and understand the judgments required in using a principle-based standard. Although it is still unclear whether the US will adopt IFRS, the global business environment makes it necessary for accounting students and professionals to be bilingual in both US GAAP and IFRS. This comprehensive textbook offers: A clear presentation of the concepts underlying IFRS A conceptual framework to guide students in interpreting and applying IFRS rules A comparison between IFRS and US GAAP to develop students' understanding of the requirements of each standard Real world examples and case studies to link accounting theory to practice, while also exposing students to different interpretations and applications of IFRS End of chapter material covering other aspects of financial reporting, including international auditing standards, international ethics standards, and corporate governance and enforcement, as well as emerging topics, such as integrated accounting, sustainability and social responsibility accounting and new forms of financial reporting Burton & Jermakowicz have crafted a thorough and extensive tool to give students a competitive edge in understanding, and applying IFRS. A companion website provides additional support for both students and instructors.

For more than 100 years, Henry's Clinical Diagnosis and Management by Laboratory Methods has been recognized as the premier text in clinical laboratory medicine, widely used by both clinical pathologists and laboratory technicians. Leading experts in each testing discipline clearly explain procedures and how they are used both to formulate clinical diagnoses and to plan patient medical care and long-term management. Employing a multidisciplinary approach, it provides cutting-edge coverage of automation, informatics, molecular diagnostics, proteomics, laboratory management, and quality control, emphasizing new testing methodologies throughout. Remains the most comprehensive and authoritative text on every aspect of the clinical laboratory and the scientific foundation and clinical application of today's complete range of laboratory tests. Updates include current hot topics and advances in clinical laboratory practices, including new and extended applications to diagnosis and management. New content covers next generation mass spectroscopy (MS), coagulation testing, next generation sequencing (NGS), transfusion medicine, genetics and cell-free DNA, therapeutic antibodies targeted to tumors, and new regulations such as ICD-10 coding for billing and reimbursement. Emphasizes the clinical interpretation of laboratory data to assist the clinician in patient management. Organizes chapters by organ system for quick access, and highlights information with full-color illustrations, tables, and diagrams. Provides guidance on error detection, correction, and prevention, as well as cost-effective test selection. Includes a chapter on Toxicology and Therapeutic Drug Monitoring that discusses the necessity of testing for therapeutic drugs that are more frequently being abused by users.

This book explains how companies that sell equipment and other products can increase product sales and add an additional profit center by establishing their own innovative leasing and financing operation. Industry data shows that the need for equipment and other product financing has evolved over the past few decades to where now nine out of ten U.S. companies use leasing or other forms of third party financing to acquire the equipment or other products they need. For market-aggressive companies offering products for sale, having an available in-house customer product leasing and financing program as a product marketing strategy can dramatically increase their ability to close product sales. In the past, establishing an in-house financing activity was difficult and expensive, requiring unique and substantial additional business operational and financing components in addition to an extensive learning curve. This is no longer the case. In recent years, there have been wide-spread market advances surrounding the financing of equipment and other products that enable forward-thinking companies to cost-effectively establish their own in-house product financing activity, using readily available, state-of-the-art financing software programs, and third-party back-office services to manage any part of the financing process. This book will provide a product vendor with the turnkey know how it needs to assess the viability of establishing an in-house equipment financing operation, as well as the various considerations needed to set up and run its own cost-effective and profitable product financing activity.

Understanding the main concepts of IFRS Standards The fourth edition of Applying IFRS Standards explains the core principles of International Financial Reporting (IFRS) Standards. It also addresses the skills needed to apply the standards in business environments. The book begins with an overview of the International Accounting Standards Board (IASB) and how it establishes accounting standards. The general book topics are then covered in detail and include: income taxes, financial instruments, fair value measurement, property, inventories, employee benefits and more.

Discussion questions, exercises and references are provided throughout the book.

This book is the first comprehensive assessment of the state of low-carbon investments in Asia, analyzing the rationales, mandates and public-private financing activities. Based on the experiences of several regional initiatives wherein public financing is catalyzing private investments in low-carbon infrastructure, this book proposes a framework that can be used as a tool to identify factors that influence private investment decisions and policy instruments that can scale up the private capital. Placing the Asian economies onto a low-carbon development pathway requires an unprecedented shift in investments. This book addresses this situation by asking questions such as: • What is the central role of private finance in achieving the Paris Agreement targets? • What key policy levers and risk mitigation can governments use in an effort to unlock the potentials of private capital? • How can regionally coordinated actions hold significant promise for scaling up private investments?

This is the unbound, loose-leaf version of Intermediate Accounting, 17th Edition, Volume 2. This book is written by industry thought leaders, Kieso, Weygandt, and Warfield and is developed around one simple proposition: create great accountants. Upholding industry standards, this edition incorporates new data analytics content and up-to-date coverage of leases, revenue recognition, financial instruments, and US GAAP & IFRS. While maintaining its reputation for accuracy, comprehensiveness, and accessibility, Intermediate Accounting drives results by helping students build professional competencies through reliable problem material. The objective of this publication is multifold. First, it aims to learn from small and medium sized agrifood manufacturers about the role they play in food systems transformation in Senegal and the policy reforms required to harness their potential. Second, and more specifically, it gleans lessons from structured interviews with Senegalese rice millers, based on their day-to-day realities, highlighting the business creativity used by these firms in order to deal with difficult enabling environments. Third, the methodology adopts a food systems approach to analyze the target enterprises; cross fertilizing different disciplinary perspectives in order to develop evidence for the public sector on integrated policy making that better supports the role of small agrifood enterprises in

sustainable transformation. Finally, the study shares ideas about innovations related to procurement, operations, logistics, finance, marketing and sales, human resources, and strategic partnerships. An important contribution of this work is to demonstrate the multidimensional and complex nature of the environment within which agrifood manufacturers do business, and the need for the public sector to harness their potential to reduce poverty through off-farm employment generation and to improve food security through the sustainable supply of affordable and nutritious food to domestic and export markets.
