Silent Partners: Taxpayers and the Bankrolling of Bombardier is the shocking account of how the Canadian taxpayer unwittingly bankrolled the rise and fall of the Bombardier empire. Bombardier's improbable rise from snowmobile manufacturer in backwoods Quebec to the world's largest producer of rail and mass transit equipment and the third-largest aircraft manufacturer has been a source of national pride, especially in Quebec. Selling 94 per cent of its trains, planes, snowmobiles and watercraft outside the country, and with sales of \$24 billion, and 75,000 employees in 24 countries, Bombardier had become a global powerhouse. But this dazzling growth masked a host of problems.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Connectivity, as well as conflict, characterizes Eurasia. This edited volume explores dynamic geopolitical and geo-economic links reconfiguring spaces from the eastern edge of Europe through the western edge of Asia, seeking explanation beyond description. The ancient Silk Road tied together space, much as pipelines, railroads, telecommunications infrastructure, and similar cultural and constructed links ease the mobility of people and products in modern Eurasia. This book considers Eurasia along an interlinked corridor, with chapters illustrating the connections as a discussion foundation focusing on the shared interactions of a set of nation states through time and across space, generating more positive considerations of the resurgently important region of Eurasia. China's interests fall into three chapters: the southeastern border with Vietnam, the southwestern Himalayan edge, and the western Muslim regions. Russia's recovery relates events to a larger landmass context and focuses on the importance of historic mobility. A geo-history of the Caspian considers this petroleum-rich area as a zone of cultural and economic interconnection. The final focus on Central Asia treats the traditional heart of "Eurasia". The concluding chapter pulls together strands linking subregions for a new concept of "Eurasia" as an area linked by vital interests and overlapping histories.

This is a brand new, highly illustrated step-by-step guide for the jet ski owner (of which there are many in the UK alone) which provides helpful advice on all the aspects of ownership, handling and maintenance.
