"The Storm" (1704) is a founding document of modern journalism. It tells of the events of November 1703, when a hurricane struck Britain. It is composed of verbatim eyewitness accounts, solicited from survivors through a newspaper advertisement that Defoe placed shortly after the hurricane struck. This account remains a required reading for journalism students to this day. Daniel Defoe (c. 1660-1731) was an English writer and spy. His most famous novel, "Robinson Crusoe" (1719), is one of the earliest novels ever written, making Defoe a founding figure of the English novel. He is also remembered for his "Moll Flanders" (1722) and "Journal of the Plague Year" (1722), which remains a required reading for journalism students to this day, side-by-side with the non-fiction account of "The Storm" (1704). He wrote more than three hundred books, pamphlets and journals in his lifetime and was often in trouble with the authorities.

Across the world, the rhetoric and violence of white supremacy is rising up. Yet, explanations for white supremacist attacks typically direct attention toward an unreasonable, paranoid state of mind, and away from the neocolonial security state that made them. Offering a response to US expressions of white supremacy, Liebert reads paranoia as a dis-ease of coloniality by following its circulation within the ultimate place of reason, indeed a key arbitrator of it: Psychology. Through reflexivity, interviews, participant observation, scientific artefacts, and public art, this unique work seeks to argue for and experiment with unsettling the entwined coloniality of Psychology and the current political moment, joining with struggles for a world where it is not only white lives that matter. Tracing the spinning cogs and affective coils of the prodromal movement – a program of research that, capturing potential psychosis, illustrates the serpentine workings of a control society – Liebert argues that, within a context of psycurity, paranoia hides as reasonable suspicion, predicts the future, brands threatening bodies, and grows through fear, thereby seeping into the cracks of white supremacy, stabilizing it. Catching this argument as itself enacting psycurity, she then engages the more-than-human to search for paranoia's decolonizing, otherworldly potential; one that may revive the psykhe – breath – of psychologies too. Calling for psychologies to leave Psychology's comfort zone and make space for imagination, this performative, interdisciplinary work will engage students, researchers, and activists from an array of disciplines who wish to examine a critical and creative response to present-day racism and fascism.
