This Eighth Edition continues to focus students on two key themes that are the cornerstones of this book's success: the importance of looking at the data before beginning a hypothesis test, and the importance of knowing the relationship between the statistical test in use and the theoretical questions being asked by the experiment. New and expanded topics--reflecting the evolving realm of statistical methods--include effect size, meta-analysis, and treatment of missing data. The story of a neural impulse and what it reveals about how our brains work We see the last cookie in the box and think, can I take that? We reach a hand out. In the 2.1 seconds that this impulse travels through our brain, billions of neurons communicate with one another, sending blips of voltage through our sensory and motor regions. Neuroscientists call these blips “spikes.” Spikes enable us to do everything: talk, eat, run, see, plan, and decide. In *The Spike*, Mark Humphries takes readers on the epic journey of a spike through a single, brief reaction. In vivid language, Humphries tells the story of what happens in our brain, what we know about spikes, and what we still have left to understand about them. Drawing on decades of research in neuroscience, Humphries explores how spikes are born, how they are transmitted, and how they lead us to action. He dives into previously unanswered mysteries: Why are most neurons silent? What causes neurons to fire spikes spontaneously, without input from other neurons or the outside world? Why do most spikes fail to reach any destination? Humphries presents a new vision of the brain, one where fundamental computations are carried out by spontaneous spikes that predict what will happen in the world, helping us to perceive, decide, and react quickly enough for our survival. Traversing neuroscience’s expansive terrain, *The Spike* follows a single electrical response to illuminate how our extraordinary brains work.

Recovering Armenia offers the first in-depth study of the aftermath of the 1915 Armenian Genocide and the Armenians who remained in Turkey. Following World War I, as the victorious Allied powers occupied Ottoman territories, Armenian survivors returned to their hometowns optimistic that they might establish an independent Armenia. But Turkish resistance prevailed, and by 1923 the Allies withdrew, the Turkish Republic was established, and Armenians were left again to reconstruct their communities within a country that still considered them traitors. Lerna Ekmekcioglu investigates how Armenians recovered their identity within these drastically changing political conditions. Reading Armenian texts and images produced in Istanbul from the close of WWI through the early 1930s, Ekmekcioglu gives voice to the community's most prominent public figures, notably Hayganush Mark, a renowned activist, feminist, and editor of the influential journal Hay Gin. These public figures articulated an Armenianess sustained through gendered differences, and women came to play a central role preserving traditions, memory, and the mother tongue within the home. But even as women were being celebrated for their traditional roles, a strong feminist

movement found opportunity for leadership within the community. Ultimately, the book explores this paradox: how someone could be an Armenian and a feminist in post-genocide Turkey when, through its various laws and regulations, the key path for Armenians to maintain their identity was through traditionally gendered roles.

With characteristic boldness and careful reassessment of the evidence, MacDonald offers an alternative reconstruction of Q and an alternative solution to the Synoptic Problem: the Q+/Papias Hypothesis. To do so, he reconstructs and interprets two lost books about Jesus: the earliest Gospel, which was used as a source by the authors of Mark, Matthew, and Luke;

and the earliest commentary on the Gospels, by Papias of Hierapolis, who apparently knew Mark, Matthew, and the lost Gospel, which he considered to be an alternative Greek translation of a Semitic Matthew. MacDonald also explores how these two texts, well known into the fourth century, shipwrecked with the canonization of the New Testament and the embarrassment at outmoded eschatologies in both the lost Gospel and Papias's Exposition. This book is two things: the product of my lifelong work conceiving, developing, and growing the E-Myth way into a business model that has been applied to every imaginable kind of company in the world, as well as a product of Tony's extraordinary experience and success in applying the E-Myth to the development of his equally extraordinary enterprise, Super Lawn Technologies, Inc.

This volume celebrates 'Mark as Story' and offers critique, engagement, and exploration of the new hermeneutical vistas that emerged in the wake of this pioneering study.
