Henry O. Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill, New Jersey, USA The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. Gearge Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

A close presidential election in November could well come down to contested states or even districts--an election decided by vote theft? It could happen this year. Based on Greg Palast and Robert F. Kennedy, Jr.'s investigative reporting for Rolling Stone and BBC television, Billionaires & Ballot Bandits: How to Steal an Election in 9 Easy Steps might be the most important book published this year--one that could save the election. Billionaires & Ballot Bandits names the filthy-rich sugar-daddies who are super-funding the Super-PACs of both parties--billionaires with nicknames like "The Ice Man," "The Vulture" and, of course, The Brothers Koch. Told with Palast's no-holds-barred, reporter-on-the-beat style, the facts as he lays them out are staggering. What emerges in Billionaires & Ballot Bandits is the never-before-told-story of the epic battle being fought behind the scenes between the old money banking sector that still supports Obama, and the new hedge fund billionaires like Paul Singer who not only support Romney but also are among his key economic advisors. Although it has not been reported, Obama has shown some backbone in standing up to the financial excesses of the men behind Romney. Billionaires & Ballot Bandits exposes the previously unreported details on how operatives plan to use the hundreds of millions in Super-PAC money pouring into this election. We know the money is pouring in, but Palast shows us the convoluted ways the money will be used to suppress your vote. The story of the billionaires and

why they want to buy an election is matched with the nine ways they can steal the election. His story of the sophisticated new trickery will pick up on Palast's giant New York Times bestseller, *The Best Democracy Money Can Buy*.

WHICH IS MOVING: PEOPLE OR ARCHITECTURE? In an era where nomadism is the keyword that relates people to the rest of the world, architecture is seeking for a concrete response to the recent needs, result of the rise of mobility and worldwide travels. The proposal of new modular structures for the hospitality market defines the tendency to think movable, modular, flexible.

The political philosophy of Leo Strauss has been the subject of significant scholarly and media attention in recent years, particularly in the context of the decision to invade Iraq in 2003. Allegations that a group of Strauss-inspired Neo-conservatives intervened in the foreign policy establishment of the US in order to realise the policy of 'regime change' began to emerge soon after the invasion, and unanswered questions remain a decade later. This book addresses these claims, focusing specifically on a group of Straussians active in the spheres of intelligence production, think tanks, and the media during the period from the 9/11 attacks to the invasion in 2003. Such an examination is intended not simply to identify and expose their activities promoting the policy of 'regime change' in Iraq during this period, but also to challenge them and the Straussian logics underpinning them. Utilising the thought of Jacques Derrida, the book enacts a deconstructive challenge to Strauss' political philosophy which unsettles the fundamental assumptions it relies upon. In doing so, it exposes the securitising imperative underpinning Straussian thought and the Straussian interventions. It thereby simultaneously addresses crucial issues in political theory and contemporary foreign policy studies, while asserting that these dimensions of international politics can and should be dealt with in conjunction with each other. This book would be of interest to students and scholars of Global Politics, Political Theory, Security Studies and US Foreign Policy, and those outside the academy interested in Neo-conservatism and the 2003 invasion of Iraq.

From the performers on stage to the choreographers, designers and technicians working behind the scenes, this book considers all departments working on a production and instructs them on how to unify their individual skills towards a shared goal. In today's chaotic, high-stakes business environment, it is easy to get distracted from leadership responsibilities by focusing on tasks at hand instead of on strategy. But when you neglect to keep your leadership priorities in front of you, everyone suffers--your staff, your organization and, in the end, you. Master and apply the tools and techniques inside, and your employees will be motivated, inspired, and equipped to bring their best to work each and every day. Quick and simple leadership lessons for boosting performance, morale, and engagement "James Robbins is a terrific observer, thinker, and storyteller. If leaders will do the nine minutes he suggests each Monday morning, they will become what we have called 'meaning makers' who deliver enormous value to their employees, customers, investors, and communities." -- Dave Ulrich, professor, Ross School of Business, University of Michigan; partner, The RBL Group; coauthor, *The Why of Work* "It really works!
