opportunities and challenges of practice learning. Reflecting contemporary and innovative occupation-centred practice, it sets out a step-by-step guide to using this knowledge across a range of settings. The clear structure, templates, examples and strategies it presents demonstrate how contemporary theory can be used to inform and guide practice. Implementing Occupation-centred Practice is an essential resource for occupational therapy students during their placement preparation and throughout their placement. It also serves as a tool for practice educators who are looking for assistance in structuring learning for their students. This practical guide for occupational therapists introduces a tried and tested method for moving from assessment to intervention, by formulating plans and measurable goals using the influential Model of Human occupation (MOHO). Section 1 introduces the concept of formulation - where it comes from, what it involves, why it is important, and how assessment information can be guided by theoretical frameworks and organised into a flowing narrative. Section 2 provides specific instructions for constructing occupational formulations using the Model of Human Occupation. In addition, a radically new way for creating aspirational goals is introduced - based on a simple acronym - which will enable occupational therapists to measure sustained changes rather than single actions. Section 3 presents 20 example occupational formulations and goals, from a wide range of mental health, physical health and learning disability settings, as well as a prison service, and services for homeless people and asylum seekers. Designed for practising occupational therapists and occupational students, this is an essential introduction for all those who are looking for an effective way to formulate plans and goals based on the Model of Human

This book is a valuable resource for directing the clinical reasoning of occupational therapy assistants as they prepare to provide services to children and adolescents. Divided into 4 sections, this book explains best-practice occupational therapy services based on knowledge about occupations, occupation based and non-occupation based conceptual models, and the occupational development of children and adolescents. Through the use of multiple vignettes and case studies, the occupational therapy assistants learn how to implement interventions for children and adolescents who are experiencing specific health and learning challenges.

Reflection and application questions at the end of each chapter reinforce text content. Occupational therapy assistant "Occupational therapy always has focused on the individual as active in meaningful and purposeful activity. In hippotherapy, the therapist uses the horse as an intervention strategy to help stimulate a client, who passively sits astride a moving horse and then accommodates himself or herself to the movement. If there is no active, purposeful participation and the client is not actively or purposely involved, how does occupational therapy fit? That question is answered in this book, the first of its kind to detail the field's current and potential contributions to Hippotherapy. The chapters in this book will be useful for undergraduate and graduate students who want to study more about hippotherapy; for faculty members who plan to include hippotherapy in their academic curricula; for researchers who are studying and documenting hippotherapy; for clinicians who are working in hippotherapy or therapeutic horseback riding and want to update their knowledge in research or a particular practice area; and for riders or their parents who are interested in the development, application, and benefits of hippotherapy."--Note de l'éditeur. "This book focuses on occupational health and safety in office environments. While there are many similarities in occupational health and safety management systems and strategies across all industry sectors, applying the principles and tools in office environments is often a challenge. This is due, in large part, to the prevalent perception that office work is very low risk. This book is designed to be a guide to assist in the design and
