A group of thugs storms the Beaumont Hotel, and only Pierre Chambrun can stop the chaos There has been trouble in Central Park. Free concerts given on the great lawn have been ending in upheaval as gangs of toughs maraud through the crowd with bats, chains, and knives—taking what they want and crushing those who stand in their way. During a performance by red-hot diva Donna Ward, the park is peaceful. But afterward, the horde descends on the Beaumont Hotel, smashing the bar and storming the elevators in search of beautiful things to steal or destroy. In the chaos, someone takes three shots at Victoria Haven, the onetime beauty queen who has, for decades, occupied the penthouse. After the throng is expelled from the premises, manager Pierre Chambrun tries to discover who would want to kill this harmless old glamour girl. But his investigation is about to be upended—for the riot is only the beginning of his trouble.

This book discusses the security issues in a wide range of wireless devices and systems, such as RFID, Bluetooth, ZigBee, GSM, LTE, and GPS. It collects the findings of recent research by the UnicornTeam at 360 Technology, and reviews the state-of-the-art literature on wireless security. The book also offers detailed case studies and theoretical treatments – specifically it lists numerous laboratory procedures, results, plots, commands and screenshots from real-world experiments. It is a valuable reference guide for practitioners and researchers who want to learn more about the advanced research findings and use the off-the-shelf tools to explore the wireless world.

Turning text into valuable information is essential for businesses looking to gain a competitive advantage. With recent improvements in natural language processing (NLP), users now have many options for solving complex challenges. But it's not always clear which NLP tools or libraries would work for a business's needs, or which techniques you should use and in what order. This practical book provides data scientists and developers with blueprints for best practice solutions to common tasks in text analytics and natural language processing. Authors Jens Albrecht, Sidharth Ramachandran, and Christian Winkler provide real-world case studies and detailed code examples in Python to help you get started quickly. Extract data from APIs and web pages Prepare textual data for statistical analysis and machine learning Use machine learning for classification, topic modeling, and summarization Explain AI models and classification results Explore and visualize semantic similarities with word embeddings Identify customer sentiment in product reviews Create a knowledge graph based on named entities and their relations

An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

When Mahabali, the Asura king who conquered the three worlds, reigned there was no crime or inequality. People enjoyed their fraternity and liberty to the fullest. The unhappy gods of the Sky World decide to take the help of Lord Vishnu to overthrow Mahabali. Millions of years later, a 21st-century narrator is chosen by God to tell the untold story of Mahabali's life. Secrets soon begin to uncover. How did Mahabali create a Utopia on earth? Did Guru Sukracharya cheat him? Did he find true love? Is Mahabali still alive? Will he come again to regain his throne as the Emperor of the three worlds?

This second edition of the Oxford Latin Course combines the best features of both modern and traditional methods of Latin teaching from first stages to GCSE. Completely revised and restructured in the light of a nationwide survey of Classics teachers, it provides an exciting, stimulatingapproach to Latin based on the reading of original texts. Parts I-III are built around a narrative

detailing the life of Horace, based closely on historical sources, which helps students to develop an understanding of the times of Cicero and Augustus.

A middle-aged American retires and he and his wife go to Europe where they find a new set of values and relationships.

This book argues that 'ethnographic thinking'—the thought processes and patterns ethnographers develop through their practice—offers companies and organizations the cultural insights they need to develop fully-informed strategies. Using real world examples, Hasbrouck demonstrates how shifting the value of ethnography from simply identifying consumer needs to driving a more holistic understanding of a company or organization can help it benefit from a deeper understanding of the dynamic and interactive cultural contexts of its offerings. In doing so, he argues that such an approach can also enhance the strategic value of their work by helping them increase appreciation for openness and exploration, hone interpretive skills, and cultivate holistic thinking, in order to broaden perspectives, challenge assumptions, and cross-pollinate ideas between differing viewpoints. Ethnographic Thinking is key reading for managers and strategists specifically wishing to tap-into the potential that ethnography offers, as well as those searching more broadly for new ways to innovate practice. It is essential reading for students of applied ethnography, and recommended for scholars too.

A cruise between Florida and Venezuela leads to unexpected adventures in John Reed Scotts' 1914 novel.

Community reparation for young offenders involves unpaid work such as painting and decorating, litter picking and graffiti removal. Whilst remaining a major part of the youth justice landscape, concern has been raised about the poor quality of workplace provision. In this book, Nicholas Pamment provides the first fully researched examination of community reparation. He establishes the most comprehensive model for the effective delivery of unpaid work, demonstrating the importance of 'meaningful' work placements which facilitate key employability skills, associated with reductions in re-offending. Drawing upon empirical evidence and the experience of offenders, he warns against a formulaic approach to workplace allocation, where there is an over-reliance on low cost menial tasks. His timely study concludes that more attention needs to be paid to the rehabilitative potential of community reparation, requiring the commitment and dedication of service providers.

This is the book Gordon Williams wrote after Straw Dogs. Working in Soho at the time he turned his forensic gaze on the landscape and characters around him. Big Morning Blues evokes the Soho of that era - caught between the summer of love of the late 1960s and the winter of discontent that is to come. Slated by one reviewer for his dark and violent vision of a corrupt and drunken Soho subculture, Williams replied 'Most of the events in this book happened'. First published in 1974 this is a new edition from Reinkarnation. 'A fine book and a funny one ' THE TIMES, 'Gordon Williams is an uninhibited writer in top gear in this novel' SUNDAY TELEGRAPH. Soho Noir at its finest.

Teenage Steven and his father, Corey, take to the road with a Bible, an old army tent, and less than the best of intentions. Tired of being poor, Steven's father is certain that preaching the Word of the Lord is the easy way to fame and fortune. But just when they've got their act down pat and the money is rolling in, Steven and Corey begin to realize that what they'd originally thought of as a harmless lie is all about avarice and power and, ultimately, guilt. Each book includes a reader's guide.

Beautifully illustrated with more than 700 images, The Aloha Shirt: Spirit of the Islands tells the colourful stories behind the marvellous Hawaiian shirts: as cultural icons, evocative of the mystery and the allure of the Islands; as collectibles, valued by professional collectors and by the millions of tourists who still cherish the shirts hanging in their wardrobes; and as a lifestyle - casual, relaxed and fun. Drawing from hundreds of interviews, newspaper and magazine archives, and personal memorabilia, the

author evokes the world of the designers, seamstresses, manufacturers and retailers of the Golden Age of the Aloha shirt (from the 1930s to the end of the 1950s), who created the industry and nurtured it from its single-sewing-machine shop beginnings to an enterprise of international scope and importance. Here are the fun-loving 1960s; interviews with collectors who preserve these shirts as fine works of art; and insights into the roles of coconut buttons, matched pockets, woven labels and exotic fabrics in the evolution of the Aloha shirt.

Johnny Liddell was looking forward to his 2:30 a.m. date with Eve Wylie. Eve had thick red hair that fell down over her shoulders like a molten copper cascade, and Eve had a sullen soft-looking mouth that held more than a casual promise for Johnny Liddell. So when he got to her apartment, and found the date was off, it came as an unpleasant shock. Not that it was Eve's fault. There was very little a girl, with her throat cut from ear to ear, could do about a broken date.

This authoritative collector's book is the largest collection of Chinese weaving and embroider patterns available. For more than twenty-five hundred years the patterns of Chinese silk textiles captured the imaginations of their beholders. The woven and embroidered designs catalogued in Exquisite Fabrics, a survey by Gao Chunming, combine consummate mechanical and technical skill with an aesthetic vision driven by the need to communicate the most important message of Chinese culture. This Chinese art book is a compilation of over one thousand Chinese traditional designs found in weaving and embroidery. Known as zhiwen or wen in ancient China, these traditional patterns are the products of brilliant artistic skills that have been passed down

from one generation to the next. Available in a gorgeous slipcase, this book presents a wide and comprehensive range of classical design motifs that include: dragons phoenix birds auspicious animals floral patterns insects and fish figures religious allegorical

This magisterial study proposes a revised and innovative view of the political history of Renaissance Italy. Drawing on comparative examples from across the peninsula and the kingdoms of Sicily, Sardinia and Corsica, an international team of leading scholars highlights the complexity and variety of the Italian world from the fourteenth to early sixteenth centuries, surveying the mosaic of kingdoms, principalities, signorie and republics against a backdrop of wider political themes common to all types of state in the period. The authors address the contentious problem of the apparent weakness of the Italian Renaissance political system. By repositioning the Renaissance as a political, rather than simply an artistic and cultural phenomenon, they identify the period as a pivotal moment in the history of the state, in which political languages, practices and tools, together with political and governmental institutions, became vital to the evolution of a modern European political identity.
