This important title guides practitioners through their first implementation of FRSs, 100, 101 and 102. Under these standards, introduced in early 2013, many small to medium sized businesses will be preparing their financial statements under a fundamentally set of rules as the current UK GAAP framework will be withdrawn when the new standards take effect in 2015. The book focuses on explaining the key areas of change for practitioners to focus on and clear guidance on how the new standards should be implemented. This is backed up with extensive examples, sample policy wordings and the use of sample disclosures in each chapter. Unlike some other publications, this title focuses specifically on the areas financial reporting most likely to be encountered by companies who can be classified as falling within the scope of the new standard. Readers will benefit from the approach taken by the authors

Written by Steven Collings, winner of Accounting Technician of the Year at the British Accountancy Awards 2011, this book deals with the significant changes auditing has undergone in recent years, due in large part to well-publicised corporate disasters such as Enron and Parmalat, which have shaken the profession. In response, many countries have replaced pre-existing domestic standards with International Standards on Auditing (ISAs) in an attempt to ensure that auditors throughout the world apply the same level of standards during all audit assignments, and that audit quality remains consistent on a global basis. International Standards on Auditing are frequently updated to improve and clarify their application throughout the audit and accounting profession. They can be extremely complex and difficult to apply in real life situations. It is essential to apply the standards with sufficient rigor to enable an efficient audit to take place,

to satisfy the regulators and ensure that the client receives an audit which is beneficial, cost effective, and which conforms to the prescribed framework; however, auditors are often criticised for failing to do so. Recognising that auditing is not always an exact science, and that in many cases the auditor is called upon to make a judgement in situations open to differing opinions, this book takes a practical and pragmatic approach to following International Standards on Auditing. Steve Collings looks at the full ISAs in their final form, as reissued following the IAASB 'Clarity Project', and give auditors guidance on how to interpret and apply them in real life situations. Each redrafted or rewritten ISA is dealt with in a separate chapter, containing case studies and illustrative examples. The book also covers the regulatory framework of auditing and gives a summary of the five ethical standards applicable to auditors, as mapped by the IAASB. Detailed appendices provide an overview of IFRS and IAS, illustrative audit tests and illustrative financial statements.

The Financial Times Guide to Using and Interpreting Company Accounts is designed for the non-accountant manager, investor or entrepreneur who is expected to have financial knowledge but may not have accounting training. Wendy McKenzie approaches the project via three key points: What information will I find in these accounts?; How do I analyse the accounts?; How can I use my analysis? Using publicly available actual accounts, the book begins by covering the 'numbers' from company accounts then moves on to information such as the financial review and then explains the logic of the accounts. To help with the interpreting of the numbers Wendy shows the reader how to understand issues such as cash flow, what this will tell you about a company, how to consider a competitor's accounts and how to perform ratio calculations to help with
