With the growth in our reliance on information systems and computer science, information modeling and knowledge bases have become a focus for academic attention and research. The amount and complexity of information, the number of levels of abstraction and the size of databases and knowledge bases all continue to increase, and new challenges and problems arise every day. This book is part of the series Information Modelling and Knowledge Bases, which concentrates on a variety of themes such as the design and specification of information systems, software engineering and knowledge and process management. Attention is also paid to theoretical disciplines including cognitive science, artificial intelligence, logic, linguistics and analytical philosophy. Selected papers cover many areas of information modeling and knowledge bases, namely theory of concepts, database semantics, knowledge representation, software engineering, WWW information management, context-based information retrieval, ontological technology, image databases, temporal and spatial databases, document data management, process management, cultural modeling, social networks, personalization, interfaces, data mining and many others. The book will be of interest to all those involved in research and application in these academic areas.

In time, all schools in the developed world will move to students using their personal mobile technology in class, rather than it being provided by the school. It is not a case of if, but when. This book is designed to provide teachers and parents alike an insight into the bring-your-own-technology (BYOT) revolution sweeping across entire school communities in Australia, the US and UK, and explain the immense implications of these developments. BYOT poses potential educational, social development, economic, technological and political opportunities that will soon fundamentally change the nature of schooling, teaching, the technology used, home-school relations and the resourcing of schools. This book, drawing on the work of the path finding schools and education authorities in the UK, US and Australia, is designed to provide teachers and parents alike an insight into: 1. Why the development needs to be embraced 2. The imperative of authentic collaboration between home and school 3. What each school needs to do to ready itself 4. How to deal with the raft of options 5. The kind of whole school community implementation strategy required 6. The practicalities of achieving sustained total student usage and the many dividends that will then flow. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

"Microsoft's last Windows version, the April 2018 Update, is a glorious Santa sack full of new features and refinements. What's still not included, though, is a single page of printed instructions. Fortunately, David Pogue is back to help you make sense of it all--with humor, authority, and 500 illustrations."--Page 4 of cover.
