A novel that will have you laughing out loud one minute, and swooning the next! In the town of Newsands, painfully shy Alex is abandoned by his two best friends for the summer. But he unexpectedly lands a part-time job at Wonderland, a run-down amusement arcade on the seafront, where he gets to know the other teen misfits who work there. Alex starts to come out of his shell, and even starts to develop feelings for co-worker Ben ... who, as Alex's bad luck would have it, has a girlfriend. Then as debtors close in on Wonderland and mysterious, threatening notes start to appear, Alex and his new friends take it on themselves to save their declining employer. But, like everything in Wonderland, nothing is quite what it seems...

A fun, flirty teen debut from Wattpad phenom Alex Light about a fake relationship and real love. It's been years since seventeen-year-old Becca Hart believed in true love. But when her former best friend teases her for not having had a boyfriend, Becca impulsively pretends she's been secretly seeing someone. Brett Wells has it all. As captain of the football team and one of the most popular guys in his school, he should have no problem finding someone to date, but he's always been more focused on his future than who to bring to prom. When he overhears Becca's lie, Brett decides to step in and be the mystery guy. It's the perfect solution: he gets people off his back for not having a meaningful relationship and she can keep up the ruse that she's got a boyfriend. Acting like the perfect couple isn't easy, though, especially when you barely know the other person. But with Becca still picking up the pieces from when her world was blown apart years ago and Brett just barely holding his together now, they

begin to realize they have more in common than they ever could have imagined. When the line between what is pretend and what is real begins to blur, they're forced to answer the question: Is this fake romance the realest thing in either of their lives?

in love with Andy Field's books, *Discovering Statistics Using R* takes students on a journey of statistical discovery using R, a free, flexible and dynamically changing software tool for data analysis that is becoming increasingly popular across the social and behavioural sciences throughout the world. The journey begins by explaining basic statistical and research concepts before a guided tour of the R software environment. Next you discover the importance of exploring and graphing data, before moving onto statistical tests that are the foundations of the rest of the book (for example correlation and regression). You will then stride confidently into intermediate level analyses such as ANOVA, before ending your journey with advanced techniques such as MANOVA and multilevel models. Although there is enough theory to help you gain the necessary conceptual understanding of what you're doing, the emphasis is on applying what you learn to playful and real-world examples that should make the experience more fun than you might expect. Like its sister textbooks, *Discovering Statistics Using R* is written in an irreverent style and follows the same groundbreaking structure and pedagogical approach. The core material is augmented by a cast of characters to help the reader on their way, together with hundreds of examples, self-assessment tests to consolidate knowledge, and additional website material for those wanting to learn more. Given this book's accessibility, fun spirit, and use of bizarre real-world research it should be essential for anyone wanting to learn about statistics using the freely-available R software.

Revolutionary ideas on how to use markets to bring about fairness and prosperity for all Many blame today's economic inequality, stagnation, and political instability on the free market. The solution is to rein in the market, right? Radical Markets turns this thinking—and pretty much all conventional thinking about markets, both for and against—on its head. The book reveals bold new ways to organize markets for the good of everyone. It shows how the emancipatory force of genuinely open, free, and competitive markets can reawaken the dormant nineteenth-century spirit of liberal reform and lead to greater equality, prosperity, and cooperation. Eric Posner and Glen Weyl demonstrate why private property is inherently monopolistic, and how we would all be better off if private ownership were converted into a public auction for public benefit. They show how the principle of one person, one vote inhibits democracy, suggesting instead an ingenious way for voters to effectively influence the issues that matter most to them. They argue that every citizen of a host country should benefit from immigration—not just migrants and their capitalist employers. They propose leveraging antitrust laws to liberate markets from the grip of institutional investors and creating a data labor movement to force digital monopolies to compensate people for their electronic data. Only by radically expanding the scope of markets can we reduce inequality,

restore robust economic growth, and resolve political conflicts. But to do that, we must replace our most sacred institutions with truly free and open competition—Radical Markets shows how.

Tom Sherrington and Oliver Caviglioli present 50 essential teaching techniques, each with five clear and concise illustrations and explanations.

Real life parents talk real life parenting! Joining the parenting club in our thirties and beyond means that we are spinning an extraordinary amount of plates, often including a career at its peak. Most of us co-parent or fly solo in the true sense of the word, relying solely on our partners and/or friends when more often than not, extended family are too far away to help on a regular basis. Our parents could look to their parents for the usual guidance and extra support, but our situation is new, modern and unique. We are winging it! This book isn't a guide or a parenting manual - it's more of a support group for parents who are having their children in their thirties and forties to get together, to celebrate, share experiences, laugh and find joy in what is still the biggest life changing experience any of us will ever go through. It's the book I looked for when I was pregnant, that spoke to me as a working parent and that I couldn't find so I've had a go at writing one myself. Featuring: - Expert advice from Zita West, Clemmie Hooper, Dr Sarah Jarvis, Mother Pukka, Zoe Williams, Selfish Mother and more. - Hilarious and heart-warming anecdotes plus tips and tricks from parents winging it too. We're re-writing the rule book and winging it, but we are winging it together! Love, Alex
