Considered by many the greatest war novel of all time, *All Quiet on the Western Front* is Erich Maria Remarque's masterpiece of the German experience during World War I. I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. "The world has a great writer in Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and sure."—The New York Times Book Review

Clear Speech, Second Edition, is a highly successful and innovative pronunciation course for intermediate and advanced students of English. The Teacher's Resource Book contains an overview of the book, and contains invaluable, creative ideas for presenting the teaching points, as well as theoretical background. In addition, it contains a suggestions for additional activities, and an exercise answers.

All Clear teaches students to recognize and produce the high-frequency idioms, phrases, and contemporary expressions needed in a range of conversational situations. Each lesson focuses initially on chunks of language in the form of idioms and other expressions (collocations) and then provides many structured and communicative activities for speaking, listening, grammar, writing, pronunciation, and public speaking practice.

Mark McCormack, dubbed 'the most powerful man in sport', founded IMG (International Management Group) on a handshake. It was the first and is the most successful sports management company in the world, becoming a multi-million dollar, worldwide corporation whose activities in the business and marketing spheres are so diverse as to defy classification. Here, Mark McCormack reveals the secret of his success to key business issues such as analysing yourself and others, sales, negotiation, time management, decision-making and communication. What They Don't Teach You at Harvard Business School fills the gaps between a business school education and the street knowledge that comes from the day-to-day experience of running a business and managing people. It shares the business skills, techniques and wisdom gleaned from twenty-five years of experience.

This advanced level text teaches students to recognize and produce about 200 high-frequency idioms in ways that develop effective listening, speaking, and pronunciation skills. -- Realistic contexts allow students to perceive nuances between idioms. -- Idioms reflect contemporary North American usage -- i.e. "I've got to hand it to you", "put one's foot in one's mouth", and "it doesn't hold water". -- Focus on appropriate rhythm, stress, intonation, and systematic pronunciation practice helps students master production of idioms.

A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned.

For Kivrin Engle, preparing an on-site study of one of the deadliest eras in humanity's history was as simple as receiving inoculations against the diseases of the fourteenth century and inventing an alibi for a woman traveling alone. For her instructors in the twenty-first century, it meant painstaking calculations and careful monitoring of the rendezvous location where Kivrin would be received. But a crisis strangely linking past and future strands Kivrin in a bygone age as her fellows try desperately to rescue her. In a time of superstition and fear, Kivrin - barely of age herself - finds she has become an unlikely angel of hope during one of history's darkest hours. Winner of the Hugo Award 1993 Winner of the Nebula Award 1993 "A tour de force" - New York Times Book Review "Ambitious, finely detailed and compulsively readable" - Locus "It is a book that feels fundamentally true; it is a book to live in" - Washington Post

"Sarah and Beth are an absolute gift to our culture right now. Not only do they offer balanced perspectives from each political ideology, but they teach us how to dialogue well, without sacrificing our humanity." —Jen Hatmaker, New York Times bestselling author, speaker, and founder of Legacy Collective "Sarah from the left and Beth from the right serve as our guides through conflict and complexity, delivering us into connection. I wish every person living in the United States would read this compelling book, from the youngest voter to those holding the highest office." —Emily P. Freeman, Wall Street Journal bestselling author of *Simply Tuesday* and *The Next Right Thing* More than ever, politics seems driven by conflict and anger. People sitting together in pews every Sunday have started to feel like strangers, loved ones at the dinner table like enemies. Toxic political dialogue, hate-filled rants on social media, and agenda-driven news stories have become the new norm. It's exhausting, and it's too much. In *I Think You're Wrong (But I'm Listening)*, two working moms from opposite ends of the political spectrum contend that there is a better way. They believe that we can choose to respect the dignity of every person, choose to recognize that issues are nuanced and can't be reduced to political talking points, choose to listen in order to understand, choose gentleness and patience. Sarah from the left and Beth from the right invite those looking for something better than the status quo to pull up a chair and listen to the principles, insights, and practical tools they have learned hosting their fast-growing podcast *Pantsuit Politics*. As impossible as it might seem, people from opposing political perspectives truly can have calm, grace-filled conversations with one another—by putting relationship before policy and understanding before argument.

It is 1966, when a nineteen-year-old boy from Three Rivers, Michigan, follows family tradition by enlisting in the United States Navy. A plan which he "thinks" will guarantee an uneventful tour of duty aboard a US naval ship goes awry when he is deposited in the middle of a war zone in South Vietnam. For the next gruelling year, he performs the duties of a fleet marine force medic, caring for wounded and dying American marines. Dubbed Doc John by his comrades, he soon becomes entrenched in a strange, dangerous world, where he becomes both witness and reluctant warrior. Whether he is patching up wounded comrades or placing Band-Aids on scrapes of native children, young Doc John somehow manages to do an impossible job, even as the world is falling down around him. He not only learns the sad lessons of war, but survives them and finds himself in the process. These are the experiences of a different kind of soldier, who manages to traverse a minefield of emotional upheaval and can still tell his stories with honesty and self-deprecating humor, exemplifying the resiliency of the human spirit.

All Clear! Intro, designed for high beginning students, is the first in this best-selling series of conversationally-oriented texts. Mastering the American Accent is an easy-to-follow approach for reducing the accent of non-native speakers of English. Well-sequenced lessons in the book correspond over eight hours of downloadable audio files covering the entire text. The audio program provides clear models (both male and female) to help coach a standard American accent. The program is designed to help users speak Standard American English with clarity, confidence, and accuracy. The many exercises in the book concentrate on topics such as vowel sounds, problematic consonants such as V, W, TH, the American R and T and others. Correct lip and tongue positions for all sounds are discussed in detail. Beyond the production of sounds, the program provides detailed instruction in prosodic elements such as syllable stress, emphasis, intonation, linking words for smoother speech flow, common word contractions, and much more. Additional topics that often confuse ESL students are also discussed and explained. They include distinguishing between casual and formal speech, homophones (e.g., they're and there), recognizing words with silent letters (e.g., comb, receipt), and avoiding embarrassing pronunciation mistakes, such as mixing up "pull" and "pool." Students are familiarized with many irregular English spelling rules and exceptions, and are shown how such irregularities can contribute to pronunciation errors. A native language guide references problematic accent issues for 13 different language backgrounds.

Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop eye-hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel like they are being 'tested'! How BEE CLEVER books are DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child. First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Some recall it as the greatest adventure of their lives. For others, being a wartime evacuee was a nightmare. These are the witty yet deeply poignant memories of a man still haunted by the cruelties he endured. During World War II, around three and a half million British children were evacuated away from possible air raids in the big cities in one of the largest social upheavals Great Britain has ever seen. One of those children was Ray Evans. This is the story of a young evacuee from Liverpool sent to live in the Welsh town of Llanelli. Separated from his mother, brothers and sisters, six-year old Ray was dispatched to a series of families who ignored, exploited and brutalised him. Pushed from pillar to post, he finally finds happiness with a family who make him so welcome that he is reluctant to leave when war ends. Set in a world of ration books, air-raid sirens and ever-present danger, this is a candid and direct account of wartime Britain as seen through the eyes of a child.

BLACKOUT is the opening movement of a vast, absorbing two-volume novel that may well prove to be Connie Willis' masterpiece. Like her multi-award winning THE DOOMSDAY BOOK, this stunning new work marries the intricate mechanics of time travel to the gritty - and dangerous - realities of human history. The narrative opens in Oxford, England in 2060, where a trio of time traveling scholars prepares to depart for various corners of the Second World War. Their mission: to observe, from a safe vantage point, the day-to-day nature of life during this critical historical moment. As the action ranges from the evacuation of Dunkirk to the manor houses of rural England to the quotidian horrors of London during the Blitz, the objective nature of their roles gradually changes. Cut off from the safety net of the future and caught up in the chaotic events that make up history, they are forced to participate, in unexpected ways, in the defining events of the era. BLACKOUT is an ingeniously constructed time travel novel and a grand entertainment. More than that, it is a moving, exquisitely detailed portrait of a world under siege, a world dominated by chaos, uncertainty, and the threat of imminent extinction. It is the rare sort of book that transcends the limits of genre, offering pleasure, insight, and illumination on virtually every page.

This reader-friendly text, firmly grounded in listening theories and supported by recent research findings, offers a comprehensive treatment of concepts and knowledge related to teaching second language (L2) listening, with a particular emphasis on metacognition. The metacognitive approach, aimed at developing learner listening in a holistic manner, is unique and groundbreaking. The book is focused on the language learner throughout; all theoretical perspectives, research insights, and pedagogical principles in the book are presented and discussed in relation to the learner. The pedagogical model? a combination of the tried-and-tested sequence of listening lessons and activities that show learners how to activate processes of skilled listeners ? provides teachers with a sound framework for students' L2 listening development to take place inside and outside the classroom. The text includes many practical ideas for listening tasks that have been used successfully in various language learning contexts.

'A landmark contribution to humanity's understanding of itself' The New York Times Why can it sometimes feel as though half the population is living in a different moral universe? Why do ideas such as 'fairness' and 'freedom' mean such different things to different people? Why is it so hard to see things from another viewpoint? Why do we come to blows over politics and religion? Jonathan Haidt reveals that we often find it hard to get along because our minds are hardwired to be moralistic, judgemental and self-righteous. He explores how morality evolved to enable us to form communities, and how moral values are not just about justice and equality - for some people authority, sanctity or loyalty matter more. Morality binds and blinds, but, using his own research, Haidt proves it is possible to liberate ourselves from the disputes that divide good people.

Face the Issues is an exciting and highly successful approach to listening comprehension and discussion for intermediate and high-intermediate students. Each of the twelve units is based on an authentic radio broadcast taken from National Public Radio's "All Things Considered" and "Morning Edition." Students are presented with interesting and relevant content in unedited everyday speech including hesitations, redundancies, and various dialectical patterns.
