When a little brown wren of an Englishwoman bursts into Jamie Heyworth's private Hell and asks for help he mistakes her for the black crow of death. Why not? He fled to Rome and sits in despair with nothing left to sell and no reason to get up in the morning. Behind him lie disgrace, shame, and secrets he is desperate to keep. Nora Haley comes to Rome at the bidding of her dying brother who has an unexpected legacy. Never in her sunniest dreams did Nora expect Robert to leave her a treasure, a tiny black-eyed niece with curly hair and warm hugs. Nora will do anything to keep her, even hire a shabby, drunken major as an interpreter. Jamie can't let Nora know the secrets he has hidden from everyone, even his closest friends. Nora can't trust any man who drinks. She had enough of that in her marriage. Either one, however, will dare anything for the little imp that keeps them together, even enter a sham marriage to protect her. And don't miss *Dangerous Works*, where Jamie first appeared.

and high-frequency properties of the electron gas on the surface of a nanotube in a magnetic field in the presence of a longitudinal superlattice are presented. Following this, an interpretation of the basic transport characteristics of metals, superconductors in the normal state, and very strongly doped semiconductors with degenerate electron gas is presented. An application of the effective density of randomly moving electrons allows for an explanation of the conductivity of metals, and the electron transport characteristics such as the average diffusion coefficient, the average mobility, the mean free path, and the electron scattering mechanisms in a wide temperature range. Finally, the authors demonstrate high-performance InGaN-based light-emitting diodes with tunneling-junction-induced 2-D electron gas at an AlGaIn/GaN heterostructure, which is inserted in the middle of the P-GaN contact layer of a conventional LED structure"--

The village of Givenchy-la-Basse sits on a small rise in the Pas de Calais Department in northern France. One hundred years ago it was overtaken by the First World War. The fighting there was intense eleven Victoria Crosses were won in this tiny locality between 1914 and 1918. Phil Tomasellis in-depth account shows what happened at Givenchy when it became a battlefield, and the story here was repeated in the other villages and towns on the Western Front. Givenchy's key position made it the target for crushing bombardments, infantry assaults and subterranean warfare. The landscape was pulverized by shellfire, the ground beneath was honeycombed with tunnels. Mining operations, shelling, sniping and trench raids took place around the remains of the village even when this stretch of the front line was relatively quiet. The grueling struggle of attrition that characterized the fighting on the Western Front continued here throughout the war. Phil Tomasellis gripping narrative makes extensive use of war diary extracts, personal stories, official and unofficial histories.

In this innovative work Jean Hillier develops a new theory for students and researchers of spatial planning and governance which is grounded primarily in the work of Gilles Deleuze. The theory recognizes the complex interrelation between place qualities and the multiple space-time relational dynamics of spatial governance. Using empirical examples from England and Australia, Hillier identifies the power of networks and trajectories through which various actors territorialize space and explores the social and political responsibilities of spatial managers and decision-makers. She considers what spatial planning and urban management practices could look like if they were to be developed along

Deleuzean lines, and suggests alternative framings for spatial practice: broad trajectories or 'visions' of the longer-term future and shorter-term, location-specific detailed plans and projects with collaboratively determined tangible goals.

Between the interiors of the USA and Mexico lies a borderland: Amexica. A terrain astride the world's busiest frontier, teeming with migrants, factory workers, narcos, tourists, heroines and heroes, ranchers and rogues. A border both porous and harsh, criss-crossed by a million people every day. A warzone, where a grotesque pastiche of the globalised economy plays out in a tragedy of unfathomable violence as drug cartels and state forces face off. Amexica is a journey through the cartels' reach into the borderland's daily life: through migrant camps, drug-smuggling 'plazas', rehab centres, sweatshop factories and the mass-murder of women. Updated with new material ten years on it paints an essential portrait of a country under siege - and testament to people who carry on regardless. 'Previously, to understand the ruthlessness, ambition and impact of today's global criminals, you needed to read Roberto Saviano's Gomorrah and

“How is it that we know we are headed for destruction as a species, and yet are unable to effect the necessary changes needed for survival?” We know from history that our current thinking and values will not lead to a peaceful, sustainable future. It is more crucial now than ever that we learn to break the cycle so that we can create a global community that balances diversity and individuality with integration and harmony. The answer lies in how we think. We are trapped in social systems based on power structures designed to keep us divided in antagonistic and non-viable behaviors. We have divorced how we understand the world through science with how we find meaning in our lives through religion, alienating us from the world and each other. To overcome these challenges, we need to focus our thinking on the global community by giving priority to universal ethical values. With ethical priority, we can shift power interests from a tribal to a human perspective and reconnect understanding with meaning. We can reduce alienation and improve harmony around the world. In *The Ethical Society*, William Carruthers provides the roadmap for us to finally achieve that peaceful,

sustainable world.
