Recent acts of terror have exploded the myth that Indian youth is insulated from the global terrorism phenomenon and had little time for extremism. The communal riots post the 1992 incident, the rise of the Students Islamic Movement of India (SIMI) and the mutation of a section of aspiring Muslim youth into terrorists with the help of forces across the border. The story of home-grown jihadists would have been skewed had it not been for the testimonies of David Coleman Headley and Sarfaraz Nawaz on the involvement of the Pakistan Inter-Services Intelligence, top Lashkar-e-Taiba leadership, the Al Qaida and the Karachi project, whose demon child the Indian Mujahideen is. This book is the first-ever attempt to link up jihadists all over India and trace their linkages with terrorists based in countries like Pakistan, Nepal, Sri Lanka, Bangladesh, United Arab Emirates, Oman, Yemen and Saudi Arabia. Hilali provides an excellent study into the US-Pakistan partnership under the Reagan administration. The book explores the causes of Pakistan's involvement in the Afghanistan war and the United States' support to prevent Soviet adventurism. It shows that Pakistan was the principal channel through which assistance was provided to Afghan freedom fighters; it also provided access to its military bases to use against the Soviet Union. The study looks at the consequences of the war on Pakistan and explains how it became enmeshed within its domestic politics. Furthermore, it evaluates the role of Pakistan as a key partner in the global coalition against terrorism and discusses how General Pervez Musharraf brought about Pakistan's development towards a progressive, moderate and democratic society. Ideally suited to courses on foreign policy.

This book is focused to point out sources of economic growth and estimation of total factor productivity (TFP) for the Pakistan economy, as a whole, as well as for its major sectors (agriculture, manufacturing, and services). For this purpose the study utilized three different techniques to obtain reliable estimates of TFP for Pakistan economy. These techniques are, growth accounting technique, index number technique and econometric technique. The study covers the period from 1965 to 2005. The empirical evidence indicates that traditional measures of TFP tend to overestimate, by ignoring variation in work hours, education and skills, as well as variation in capacity utilization resulting from business fluctuations. This study avoids pitfalls of earlier studies by improving upon reliable measures of factor inputs. This feature of the study makes it distinct from previous studies and enables it to provide reliable results. Hence, based upon such reliable results efficient economic policy may be formulated.

Kashmir is one of the most protracted and bloody occupations in the world—and one of the most ignored. Under an Indian military rule that, at half a million strong, exceeds the total number of US forces in Iraq and Afghanistan, freedom of speech is non-existent, and human- rights abuses and atrocities are routinely visited on its Muslim-majority population. In the last two decades alone, over seventy thousand people have died. Ignored by its own corrupt politicians, abandoned by Pakistan and the West, which refuses to bring pressure to bear on its regional ally, India, the Kashmiri people's ongoing quest for justice and self- determination continues to be brutally suppressed. Exploring the causes and consequences of the occupation, *Kashmir: The Case for Freedom* is a passionate call for the end of occupation, and for the right of self-determination for the Kashmiri people.
