This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Excerpt from Audels Engineers and Mechanics Guide 5: A Progressive Illustrated Series With Questions-Answers Calculations, Covering Modern Engineering Practice Where the question and answer form is used the plan has been to give short simple and direct answers limited to one paragraph, thus simplifying the more complex matter. In order to have adequate space for the presentation of the important matter and not to divert the attention of the reader, descriptions of machines have been excluded from the main text, being printed in smaller type under the illustrations. Excerpt from Audels Engineers and Mechanics Guide 1: A Progressive Illustrated Series With Questions-Answers Calculations Covering Modern Engineering Practice, Specially Prepared for All Engineers All Mechanics and All Electricians, a Practical Course of Study and Reference for All Students and Workers in E In planning this helpful series of Educators, it has been the aim of the author and publishers to present step by step a logical plan of study in General Engineering Practice, taking the middle ground in making the information readily available and showing by text, illustration, question and answer, and calculation, the theories, fundamentals and modern applications, including construction in an interesting and easily understandable form. Where the question and answer form is used, the plan has been to give short, simple and direct answers, limited to one paragraph, thus simplifying the more complex matter. In order to have adequate space for the presentation of the important matter and not to divert the attention of the reader, descriptions of machines have been excluded from the main text, being printed in smaller type under the illustrations. Leonardo Da Vinci once said: "Those who give themselves to ready and rapid practice before they have learned the theory, resemble sailors who go to sea in a vessel without a rudder" -in other words, "a little knowledge is a dangerous thing " Accordingly the author has endeavored to give as much information as possible in the space allotted to each subject. The author is indebted to the various manufacturers for their co-operation in furnishing cuts and information relating to their products. These books will speak for themselves and will find their place in the great field of Engineering. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Excerpt from Audels Engineers and Mechanics Guide 3: A Progressive Illustrated Series, With Questions-Answers Calculations, Covering Modern Engineering Practice, Specially Prepared for All Engineers, All Mechanics and All Electricians When locomotive builders started work, they used as few wheels as possible. The first engines had one pair of drivers to make the engine move, and one pair of carrying wheels to keep it on the track. The boilers were built as small as possible to do the work, and were placed between the wheels. Only about one-half of the weight was available for adhesion. The hardcover, fully updated edition of the only multi-craft trade guide Respected by generations of skilled workers, Audel Millwright's and Mechanic's Guide is the only trade manual to cover maintenance and troubleshooting for all the mechanical trades in a single volume. Now available in hardcover, it covers the newest equipment on shop floors as well as older machinery, sometimes more than 30 years old, for which little maintenance and repair information remains available. Millwrights, mechanics, machinists, carpenters, pipe fitters, electricians, engineers, and those who supervise them will find this book invaluable. The only hardcover maintenance and repair manual to cover all the mechanical trades in one guide This updated guide covers new industrial machinery as well as 30-year-old equipment for which little information can be found Essential for those who repair machinery as well as machinists, carpenters, pipe fitters, electricians, millwrights, mechanics, engineers, mechanical technicians, industrial maintenance managers, and construction tradespeople This hardcover edition of Audel Millwright's and Mechanic's Guide is as valuable to today's skilled workers as previous editions were to their fathers and grandfathers.
