Ezekiel Blue's father committed a crime, unleashing a deadly menace into steampowered Seattle. And his bereaved family has paid the price. Now, Ezekiel is determined to clear his father's name, risking death and the undead in the attempt. Sixteen years ago, as the American Civil War dawned, gold brought hordes to the frozen Klondike. Fanatical in their greed, Russian prospectors commissioned Dr Leviticus Blue to create a great machine, to mine through Alaska's ice. Thus the Incredible Bone-Shaking Drill Engine was born. But the Boneshaker went awry, destroying downtown Seattle and unearthing a subterranean vein of blight gas.

Anyone who breathed its fumes turning into the living dead. The devastated city is now walled in to contain the blight. But unknown to Briar, his widowed mother, Ezekiel is going in. His quest will take him into a city teeming with ravenous undead, air pirates, criminal overlords, and heavily armed refugees. And only Briar can bring him out alive. 'I don't know why I behaved the way I did, and I kept doing it; he kept doing it. And though I might once have easily brushed it away, suddenly I could not. Nor could I confront him. The conversation moved too quickly.' This is *Pleasure* is an extraordinary work by one of the world's finest writers, and achieves more in 15,000 words than most full-length novels. Following the unravelling of the life of a male publisher undone by allegations of sexual impropriety and harassment, and the female friend who tries to understand, and explain, his actions, it looks unflinchingly at our present moment and rejects moral certainties to show us that there are many sides to every story. Mary Gaitskill has spent her whole career mining the complexity of human relationships on both an individual and societal scale with wisdom and grace. Here her insights are more piercing and timely than ever.

THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future?

Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. *The Age of Surveillance Capitalism* is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.

Real-life 7-year-old Sophia Spencer was bullied for loving bugs until hundreds of women scientists rallied around her. Now Sophie tells her inspiring story in this picture book that celebrates women in science, bugs of all kinds, and the importance of staying true to yourself. Makes a perfect gift for nature lovers on Earth Day and every day! Sophia Spencer has loved bugs ever since a butterfly landed on her shoulder--and wouldn't leave!--at a butterfly conservancy when she was only two-and-a-half years old. In preschool and kindergarten, Sophia was thrilled to share what she knew about grasshoppers (her very favorite insects), as well as ants and fireflies... but by first grade, not everyone shared her enthusiasm. Some students bullied her, and Sophia stopped talking about bugs altogether. When Sophia's mother wrote to an entomological society looking for a bug scientist to be a pen pal for her daughter, she and Sophie were overwhelmed by the enthusiastic response--letters, photos, and videos came flooding in. Using the hashtag BugsR4Girls, scientists tweeted hundreds of times to tell Sophia to keep up her interest in bugs--and it worked! Sophia has since appeared on Good Morning America, The Today Show, and NPR, and she continues to share her love of bugs with others.
