This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work.

Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

In her exuberant new work, BOBBED HAIR AND BATHTUB GIN, Marion Meade presents a portrait of four extraordinary writers--Dorothy Parker, Zelda Fitzgerald, Edna St. Vincent Millay, and Edna Ferber--whose loves, lives, and literary endeavors embodied the spirit of the 1920s. Capturing the jazz rhythms and desperate gaiety that defined the era, Meade gives us Parker, Fitzgerald, Millay, and Ferber, traces the intersections of their lives, and describes the men (F. Scott Fitzgerald, Edmund Wilson, Harold Ross, and Robert Benchley) who influenced them, loved them, and sometimes betrayed them. Here are the social and literary triumphs (Parker's Round Table witticisms appeared almost daily in the newspapers and Ferber and Millay won

Pulitzer Prizes) and inevitably the penances each paid: crumbled love affairs, abortions, depression, lost beauty, nervous breakdowns, and finally, overdoses and even madness. These literary heroines did what they wanted, said what they thought, living wholly in the moment. They kicked open the door for twentieth-century women writers and set a new model for every woman trying to juggle the serious issues of economic independence, political power, and sexual freedom. Meade recreates the excitement, romance, and promise of the 1920s, a decade celebrated for cultural innovation--the birth of jazz, the beginning of modernism--and social and sexual liberation, bringing to light, as well, the anxiety and despair that lurked beneath the nonstop partying and outrageous behavior. A vibrant mixture of literary scholarship, social history, and scandal, *BOBBED HAIR AND BATHTUB GIN* is a rich evocation of a period that will forever intrigue and captivate us.

"Hormegeddon" is the term coined by entrepreneur and New York Times Bestselling Author Bill Bonner to describe what happens when you get too much of a good thing in the sphere of public policy, economics and business. Simply put, it ends in disaster. Drawing on stories and examples from throughout modern political history--from Napoleon's invasion of Russia to the impending collapse of the American healthcare system, from the outbreak of WWII and the fall of the Third Reich to the 21st century War on Terror, from the Great Recession to the sovereign debt crisis--Bonner pursues a modest ambition: to understand what goes wrong. History is not a clean yarn spun by its victors. It is a long tale of things that went FUBAR--debacles, disasters, and catastrophes. That each disaster carries with it a warning is what makes it useful to study. For instance, if the architect of a great ship tells you that 'not even God himself could sink this ship, ' you should take the next boat. If the stock market is selling at 20 times earnings and all the expert analysts urge you to 'get in' because you 'can't lose'-it's time to get out! Similarly, public policy disasters are what you get when well meaning people with this same Titanic degree of certitude apply rational, small-scale problem-solving logic to inappropriately large scale planning. First, you get a declining rate of return on your investment (of time or resources) until you hit zero. Then, if you keep going through the zero floor--and you always keep going--you get a disaster. The problem is, these disasters cannot be stopped by well-informed smart people with good intentions, because they are the people who cause them in the first place. From the mind of Bill Bonner comes *Hormegeddon*, a phenomenon that occurs when a small dose of something produces a favorable result, but if you increase the dosage, the results end in disaster. The same applies when the world gets too much of a good thing in public policy, economics, and business. Drawing on examples throughout modern political history, Bonner brings context and understanding to this largely ignored and anonymous phenomenon.
