George Bailey is an ordinary guy, working the nine to five as a handyman and trying to make the best of the little he's got. But when he sleeps, he dreams of fire and flying, of zombies and superheroes. When the two realities start to merge, George begins to question if he's gone mad. That, or something has gone terribly wrong... The latest instalment in the Ex Series.

"Who knew that a who-dun-it would not only keep you guessing—but have you laughing! Deborah Sharp is the new Edna Buchanan."—Hoda Kotb, co-anchor of NBC's Today show Meet Mama: a true Southern woman with impeccable manners, sherbet-colored pantsuits, and four prior husbands, able to serve sweet tea and sidestep alligator attacks with equal aplomb. Mama's antics—especially her penchant for finding trouble — drive her daughters Mace, Maddie, and Marty to distraction. One night, while settling in to look for ex-beaus on COPS, Mace gets a frantic call from her mother. This time, the trouble is real: Mama found a body in the trunk of her turquoise convertible and the police think she's the killer. It doesn't help that the handsome detective assigned to the case seems determined to prove Mama's guilt or that the cowboy who broke Mace's heart shows up at the local Booze & 'n' Breeze in the midst of the investigation. Before their mama lands in prison—just like an embarrassing lyric from a country-western song—Mace and her sisters must find the real culprit. ***FINALIST, USA Best Books 2010 Awards – Spirituality & Self-Help: Relationships The quest for lasting love is one of life's essential pursuits, in some ways the most essential. But it's also a quest that's impossible to separate from spiritual and sexual needs. In Eros Ascending, author John Maxwell Taylor offers a wide-ranging study of sexual dysfunction in society and explains how healthy sexuality can be an entryway to universal love and higher consciousness. Based on Taylor's twenty-three-year experience with Taoist practices, the book presents an engaging analysis of love, relationships, and sexuality from spiritual, romantic, and sexual perspectives. Taylor melds essential ideas by Jung, Gurdjieff, and Taoist Master Mantak Chia with science, biology, spiritual tradition, and current popular culture to shed new light on this eternal yet misunderstood subject. Not just for couples, the book is equally useful for single people who want to understand the methods for "learning to love yourself" in preparation for a fulfilling, long-term relationship. Taylor draws on his eclectic background as a successful playwright, composer, actor, and musician in this persuasive plan for converting ordinary sexual energy into food for the soul. Includes an introduction to the national covenants.

Bill Gates is not only the world's most successful capitalist; he's the world's biggest philanthropist. Gates has approached philanthropy the same way he revolutionized computer software: with a fierce ambition to change the rules of the game. That's why at last year's annual meeting of the World Economic Forum in Davos, Switzerland, Gates advocated a 'creative capitalism', in which big corporations should integrate doing good into their way of doing business. This controversial new idea is discussed and debated by the more than 40 contributors to this book, among them three Nobel laureates and two former U.S. cabinet secretaries. Edited by author and columnist Michael Kinsley, *Creative Capitalism* brings together some of the world's best minds to engage Gates's challenge. From Warren Buffet, who seconds Gates's analysis, to Lawrence Summers, who worries about the consequences of multiple corporate objectives, the essays cover a broad spectrum of opinion. *Creative Capitalism* is not just a book for philanthropists. It's a book that challenges the conventional wisdom about our economic system, a roadmap for the new global economy that is emerging as capitalism adapts itself once again to a changing world.

This book 'Signals and Systems' is a detailed textbook designed for undergraduate students of various branches of Engineering. The book uses a student-friendly approach to explain the fundamental concepts of Signals and Systems. It includes a large number of solved examples with step-by-step solutions for easier understanding of the theoretical concepts. Beginning with concepts of signals, the book moves on to other topics such as convolution and correlation of signals, CTFS, DTFS, CTFT, Sampling, Laplace Transform, and Z-Transform. Further, the subject matter is presented by illustrating the concepts first through theoretical concepts along with mathematical reasoning and then through solved examples. Solving the number of multiple choice questions and numerical exercises at the end of the chapters will help students to apply the concepts learnt in the chapters.

Join celebrity chef Luke Nguyen on a culinary and cultural journey through the country of his heritage to discover the people and food that have endeared Vietnam to the millions of international travellers who visit each year. Tying in with Luke's immensely popular SBS TV show, *Luke Nguyen's Vietnam*, this book follows his trip from southern Vietnam up to the north, through the marketplaces, backyards and kitchens of strangers and family alike. In addition to the stunning location photography and mouth-watering food shots, Luke's records of his experiences with the people he meets and the places he visits along the way pepper the pages of this book, breathing life into the classic recipes of Vietnam, from pho to banh mi and everything in between.

This book presents a detailed sociolinguistic study of the traditionally Catalan-speaking areas of Southern France, and sheds new light on language attitudes, phonetic variation, language ideologies and minority language rights. The region's complex dual identity, both Catalan and French, both peripheral and strategic, is shown to be reflected in the book's attitudinal findings which in turn act as reliable predictors of phonetic variation. The author's careful discursive analysis paints a clear picture of the linguistic ideological landscape: in which French dominates as the language of status and prestige. This innovative work, employing cutting-edge mixed methods, provides an in-depth account of an under-examined language situation, and draws on this research to propose a number of policy recommendations to protect minority rights for speakers of Catalan in the region. Combining language attitudes, sociophonetics, discourse studies, and language policy, this will provide an invaluable reference for scholars of French and Catalan studies and minority languages around the world.

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern

Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of *Korean: A Comprehensive Grammar* makes it an essential reference source on the Korean language. Margaret Tuttle's story is one of love unsought, for she had been perfectly content with the well-ordered and conveniently predictable life she had arranged for herself. But something dark lurks beneath the surface of her placid and uncluttered being, something dusty with neglect, yet painful to the touch. Birdie Freeman is everything Margaret is not: homely, humble, and generous. It is Birdie who manages, through nothing but acts of love, to dredge up Margaret's memories of things better left buried. Then Margaret discovers that Birdie harbors secrets of her own. "This book reminds me of why I love to read."--Michelle Collings, Editor, Doubleday/Crossings Book Club German history films that focus on utopianism and political dissent and their effect on German identity since 1989.

The construction of solutions of singularly perturbed systems of equations and boundary value problems that are characteristic for the mechanics of thin-walled structures are the main focus of the book. The theoretical results are supplemented by the analysis of problems and exercises. Some of the topics are rarely discussed in the textbooks, for example, the Newton polyhedron, which is a generalization of the Newton polygon for equations with two or more parameters. After introducing the important concept of the index of variation for functions special attention is devoted to eigenvalue problems containing a small parameter. The main part of the book deals with methods of asymptotic solutions of linear singularly perturbed boundary and boundary value problems without or with turning points, respectively. As examples, one-dimensional equilibrium, dynamics and stability problems for rigid bodies and solids are presented in detail. Numerous exercises and examples as well as vast references to the relevant

Russian literature not well known for an English speaking reader makes this a indispensable textbook on the topic.

Harold Wilson's famous reference to 'white heat' captured the optimistic spirit of a society in the midst of breathtaking change. From the gaudy pleasures of Swinging London to the tragic bloodshed in Northern Ireland, from the intrigues of Westminster to the drama of the World Cup, British life seemed to have taken on a dramatic new momentum. The memories, images and colourful personalities of those heady times still resonate today: mop-tops and mini-skirts, strikes and demonstrations, Carnaby Street and Kings Road, Harold Wilson and Edward Heath, Mary Quant and Jean Shrimpton, Enoch Powell and Mary Whitehouse, Marianne Faithfull and Mick Jagger. In this wonderfully rich and readable historical narrative, Dominic Sandbrook looks behind the myths of the Swinging Sixties to unearth the contradictions of a society caught between optimism and decline.

We've stood up - we've lain down - we've concentrated. We've sat interminably while that tiresome old woman recited extremely unflattering verses at us. We've endured five séances - we've watched her fling herself in and out of trances until we're dizzy, and at the end of it all we find ourselves exactly where we were at the beginning. Researching for his new novel, Charles Condomine invites the implausible medium Madame Arcati to his house for a séance. Whilst consumed in a trance, Madame Arcati unwittingly summons the ghost of Charles's dead wife, Elvira. Appearing only to Charles, Elvira soon makes a play to reclaim her husband, much to the chagrin of Charles's new wife, Ruth. One husband, two feuding wives and a whisper of mischief in the air - who will win in Coward's unworldly comedy? Written in 1941, *Blithe Spirit* remained the longest-running comedy in the history of the British theatre for three decades thereafter.

Dealing with relationships on both sides of the grave, it is an enduring classic. A new edition of Coward's classic play published to coincide with the 2014 new West End revival at the Gielgud Theatre, starring Angela Lansberry as Madame Arcati.

For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years. But this year, something new is about to happen. The oldest prophecies are about to be fulfilled - and the Festival of Blessings is finally upon us.

The text combines elements of traditional Health Assessment texts with innovative elements that facilitate understanding of how best to obtain accurate data from patients. To get to his heart, she seduced his mind What will you do if one day a svelte and sexy girl comes up to you and says she is your ex? And the only thing you know about her is that you don't know anything about her. Neel, an aspiring author, meets Nivrita at the Jaipur Literature Festival. Though Nivrita says she is his ex, he remembers nothing, and yet everything about her seems to lure him to unravel the mystery she personifies. The more he is drawn to her, the more Neel feels guilty because he is already in a steady relationship with Titiksha, the love of his life. When Nivrita makes a tempting offer to Neel, which he accepts for his own good, his life slowly begins to spiral out of control while Titiksha starts turning into a stranger until Neel realizes there's much more than his eyes can see and mind can recollect. Novoneel Chakraborty, bestselling author of *A Thing beyond Forever*, *That Kiss in the Rain* and *How About a Sin Tonight?* brings forth yet another poignant story, twisted in essence. Ex will make you your jaw drop wide open.

The culmination of 34 years of ethnographic fieldwork and archival research, this book offers ground-breaking insights into fundamental principles of Huichol shamanism and ritual. The scope and length of Fikes's research, combined with the depth of his participation with four Huichol shamans, enable him to convey with empathy details of shamanic initiation, methods for diagnosis and treatment of illness, and motives for performing funeral, deer and peyote hunting, and maize-cultivating rituals.

This book presents a systematic approach to analyzing the challenging engineering problems posed by the need for security and privacy in implantable medical devices (IMD). It describes in detail new issues termed as lightweight security, due to the associated constraints on metrics such as available power, energy, computing ability, area, execution time, and memory requirements. Coverage includes vulnerabilities and defense across multiple levels, with basic abstractions of cryptographic services and primitives such as public key cryptography, block ciphers and digital signatures. Experts from Computer Security and Cryptography present new research which shows vulnerabilities in existing IMDs and proposes solutions. Experts from Privacy Technology and Policy will discuss the societal, legal and ethical challenges surrounding IMD security as well as technological solutions that build on the latest in Computer Science privacy research, as well as lightweight solutions appropriate for implementation in IMDs.

This volume is the first to bring together the V&A Museum's collection of 19th-century temple hangings from South India, made in the kalamkari style of hand drawing, mordant-dyeing and painting. This is the first time they have been fully illustrated with complete translations of their inscriptions, accompanied by detailed analyses of their narratives. Published in association with the V&A Museum, London, this volume features original research and lavish illustrations.
