This volume contains the majority of the papers presented at the Fifth Annual Meeting of the Semiotic Society of America, held in Lubbock, Texas, October 16-19, 1980. The varied styles topics, methodologies, and intellectual traditions represented here reflect the current state of flux in semiotics--a healthy chaos, in which new ideas vie for survival and experiment is at a premium. Because of this variety, we have kept our editorial interventions to a minimum. In addition, we have refrained from imposing any topical classification. While we could have used the panel titles as a taxonomic principle, this would not have produced a sufficiently even format. We have therefore utilized the alphabetical order of authors' surnames as being as tensibly the least "loaded." These Proceedings represent a current view of the "semiotic scene," especially in the U.S.A. They also include some work representative of architectural semiotics from the U.K. We have tried to bring the volume to publication rapidly, since the immediacy of the contents would seem to be the primary asset of any such project. We would like to express the Society's collective gratitude to the 1980 Program Committee chaired by Richard Bauman (University of Texas-Austin), the Lubbock Local Arrangements Committee chaired by Nancy P. Hickerson (Texas Tech University), and our special thanks to Laurel Phipps of the School of Continuing Education at Texas Tech University.
