Penpals for Handwriting is a complete handwriting scheme for 3-11 year olds that offers clear progression through five developmental stages: physical preparation for handwriting; securing correct letter formation; beginning to join along, securing the joins and practicing speed, fluency and developing a personal style. Penpals is focused on whole-class teaching using digital resources to enable modelling and interactive learning, along with Practice Books and Workbooks to support independent work. The Foundation content is in line with the EYFS Framework and the Year 1-6 content supports frequent, discrete and direct teaching of handwriting for 5-11 year olds, as required by National Curriculum 2014. Penpals supports all UK curricula and CIE Primary English curriculum.

Mark McCormack, dubbed 'the most powerful man in sport', founded IMG (International Management Group) on a handshake. It was the first and is the most successful sports management company in the world, becoming a multi-million dollar, worldwide corporation whose activities in the business and marketing spheres are so diverse as to defy classification. Here, Mark McCormack reveals the secret of his success to key business issues such as analysing yourself and others, sales, negotiation, time management, decision-making and communication. What They Don't Teach You at Harvard Business School fills the gaps between a business school education and the street knowledge that comes from the day-to-day experience of running a business and managing people. It shares the business skills, techniques and wisdom gleaned from twenty-five years of experience.

Advancements in the technology and availability of data sources have led to the 'Big Data' era. Working with large data offers the potential to uncover more fine-grained patterns and take timely and accurate decisions, but it also creates a lot of challenges such as slow training and scalability of machine learning models. One of the major challenges in machine learning is to develop efficient and scalable learning algorithms, i.e., optimization techniques to solve large scale learning problems. Stochastic Optimization for Large-scale Machine Learning identifies different areas of improvement and recent research directions to tackle the challenge. Developed optimisation techniques are also explored to improve machine learning algorithms based on data access and on first and second order optimisation methods. Key Features: Bridges machine learning and Optimisation. Bridges theory and practice in machine learning. Identifies key research areas and recent research directions to solve large-scale machine learning problems. Develops optimisation techniques to improve machine learning algorithms for big data problems. The book will be a valuable reference to practitioners and researchers as well as students in the field of machine learning.

Cambridge Primary English is a flexible, endorsed course written specifically to support Cambridge International Examinations' curriculum framework (Stages 1-6).
