Choosing College strips away the noise to help you understand why you're going to school. What's driving you? What are you trying to accomplish? Once you know why, the book will help you make better choices.

The research in this book illustrates that choosing a school is complicated. By constructing more than 200 mini-documentaries of how students chose different postsecondary educational experiences, the authors explore the motivations for how and why people make the decisions that they do at a much deeper, causal level. By the end, you'll know why you're going and what you're really chasing. The book: Identifies the five different Jobs for which students hire postsecondary education Allows you to see your true options for what's next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each Job The authors help readers understand not what job students want out of college, but what "Job" students are hiring college to do for them.
