Creating Calm Classrooms focuses exclusively on how to make any teacher an effective classroom manager and teacher.

Kaufmann and Schwitters have built this text's reputation on clear and concise exposition, numerous examples, and plentiful problem sets. This traditional text consistently reinforces the following common thread: learn a skill; practice the skill to help solve equations; and then apply what you have learned to solve application problems. This simple, straightforward approach has helped many students grasp and apply fundamental problem solving skills necessary for future mathematics courses. Algebraic ideas are developed in a logical sequence, and in an easy-to-read manner, without excessive vocabulary and formalism. The open and uncluttered design helps keep students focused on the concepts while minimizing distractions. Problems and examples reference a broad range of topics, as well as career areas such as electronics, mechanics, and health, showing students that mathematics is part of everyday life. The text's resource package—anchored by Enhanced WebAssign, an online homework management tool—saves instructors time while also providing additional help and skill-building practice for students outside of class. From principles to practice--all the tools you need to be an effective mathematics teacher Now combining theory, methods, and instructional activities in one convenient volume, Heddens and Speer's Eleventh Edition of Today's Mathematics provides a valuable set of ideas and reference materials for actual classroom use. The text will help you thoroughly understand what you need to teach to meet today's NCTM standards, and how to present it in the most effective way possible. This edition features a fully integrated CD of teacher resources. With Today's Mathematics, 11e, you can:

- \* Learn about contemporary philosophies and psychologies of learning, teaching, and assessing mathematics.
- \* Explore the nature and scope of a beginning mathematics program for the primary grades.
- \* Master the content strands commonly found in pre-K - Grade 8 mathematics curricula.
- \* Examine the roles of problem solving, decision making, and communication in mathematics.
- \* Discover effective ways to use tools such as calculators, computers, and technology in the classroom.

New virtual manipulatives CD The enclosed CD features a library of interactive, web-based manipulatives for mathematics instruction. The CD also includes an overview of eight content strands, a checklist of mathematical concepts organized by concept clusters, several thematic mathematics activities,

student engagement and comprehension, including learning objectives, key term definitions, comprehensive case studies, classroom discussion questions, and challenging practice problems. Clear, topically—organized chapters guide students from fundamental concepts of borrowing, lending, investing, and time value of money, to more complex topics such as capitalized and future worth, external rate of return, depreciation, and after-tax economic analysis. This fully-updated second edition features substantial new and revised content that has been thoroughly re-designed to support different learning and teaching styles. Numerous real-world vignettes demonstrate how students will use economics as practicing engineers, while plentiful illustrations, such as cash flow diagrams, reinforce student understanding of underlying concepts. Extensive digital resources now provide an immersive interactive learning environment, enabling students to use integrated tools such as Excel. The addition of the WileyPLUS platform provides tutorials, videos, animations, a complete library of Excel video lessons, and much more.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly

Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

This new text helps student teachers prepare to teach effectively in technologies education in primary school classrooms. Part A of the book provides the context of technologies education and the new Australian Curriculum: Technologies. Introductory chapters discuss what 'technology' is and its role in human society, emphasising the idea of technology as a process rather than a product. Chapters also examine why technologies education is important, how it relates to other fields such as science and engineering, and how it has changed over the years. Part B then focuses on key concepts and elements in teaching technologies to primary students. Topics covered include: creativity and the design process; suitable pedagogies for technologies education; planning; assessment; and where to find appropriate resources. The final part of the book gives an overview of core concepts within the 'Design and technologies' and 'Digital technologies' subjects of this learning area within the Australian Curriculum: Technologies.

This book shows how principles of self-regulated learning are being implemented in secondary classrooms. The 14 chapters are theoretically driven and supported by empirical research and address all common high school content areas. The book comprises 29 lesson plans in English language arts, natural and physical sciences, social studies, mathematics, foreign language, art, music, health, and physical education. Additionally, the chapters address students with special needs, technology, and homework. Each chapter begins with one or more lesson plans written by master teachers, followed by narratives explaining how the lesson plans were implemented. The chapters conclude with an analysis written by expert researchers of the self-regulated learning elements in the lessons. Each lesson and each analysis incorporate relevant educational standards for that area. Different types of high schools in several states serve as venues. This powerful new book edited by Maria K. the development of academic self-regulation. Each chapter is jointly written by teachers who provide a wealth of materials, including lesson plans, and researchers who situate these lesson plans and academic self-regulation goals within the larger work on self-regulation. The topics covered are far broader than any other book I have seen in terms of developing academic self-regulation, covering over a dozen content areas, including literacy, mathematics, social studies, the sciences, and the arts. Teachers and scholars alike will find this book a must read. Karen Harris, EdD, Arizona State University A practical and magnificent blend of educational research and application. This book goes beyond presenting the findings of research on self regulation by connecting detailed strategies that align with the standards to the research.

DiBenedetto et al. clearly illustrate how to develop self regulated learners in the classroom.
