This collection is a critical reflection of the evolution of Caribbean countries since the demise of the West Indies Federation in 1962. At this historical juncture, some territories opted for independence while others remained dependent territories. The volume examines Caribbean societies in comparative and general ways, covering aspects of their ongoing development and challenges. It covers such areas as Caribbean integration, the state of human capital and social policy in the region, the education sector, Caribbean economic sustainability, and, significantly, the physical environment of the Caribbean. A central question has always been: should these territories have gone independent or stayed under some British tutelage? The book addresses this question, illustrating that these island states have made considerable progress, especially in the maintenance and deepening of democratic practices.

Throughout the pharaonic period, hieroglyphs served both practical and aesthetic purposes. Carved on stelae, statues,

and temple walls, hieroglyphic inscriptions were one of the most prominent and distinctive features of ancient Egyptian visual culture. For both the literate minority of Egyptians and the vast illiterate majority of the population, hieroglyphs possessed a potent symbolic value that went beyond their capacity to render language visible. For nearly three thousand years, the hieroglyphic script remained closely bound to indigenous notions of religious and cultural identity. By the late antique period, literacy in hieroglyphs had been almost entirely lost. However, the monumental temples and tombs that marked the Egyptian landscape, together with the hieroglyphic inscriptions that adorned them, still stood as inescapable reminders that Christianity was a relatively new arrival to the ancient land of the pharaohs. In *Egyptian Hieroglyphs in the Late Antique Imagination*, Jennifer Westerfeld argues that depictions of hieroglyphic inscriptions in late antique Christian texts reflect the authors' attitudes toward Egypt's pharaonic past. Whether hieroglyphs were condemned as idolatrous images or valued as a source of mystical knowledge, control over the representation and interpretation of hieroglyphic texts constituted an important source of Christian authority. Westerfeld examines the ways in which hieroglyphs are deployed in the works of Eusebius and Augustine, to debate biblical chronology; in Greek, Roman, and patristic sources, to claim that hieroglyphs encoded the mysteries of the Egyptian priesthood; and in a polemical sermon by the fifth-century monastic leader Shenoute of Atripe, to argue that hieroglyphs should be destroyed lest they promote a return to idolatry. She argues that, in the absence of any genuine understanding of hieroglyphic writing, late antique Christian authors were able to take this powerful symbol of Egyptian identity and manipulate it to serve their particular theological and ideological ends.

This Handbook provides a systematic and analytical approach to the various dimensions of international, ethnic and domestic conflict over the uses of national history in education since the end of the Cold War. With an upsurge in political, social and cultural upheaval, particularly since the fall of state socialism in Europe, the importance of history textbooks and curricula as tools for influencing the outlooks of entire generations is thrown into sharp relief. Using case studies from 58 countries, this book explores how history education has had the potential to shape political allegiances and collective identities. The contributors highlight the key issues over which conflict has emerged – including the legacies of socialism and communism, war, dictatorships and genocide – issues which frequently point to tensions between adhering to and challenging the idea of a cohesive national identity and historical narrative. Global in scope, the

Handbook will appeal to a diverse academic audience, including historians, political scientists, educationists, psychologists, sociologists and scholars working in the field of cultural and media studies.
