

Document For Vialle

Broad-based and hands-on, Phase-Lock Basics, Second Edition is both easy to understand and easy to customize. The text can be used as a theoretical introduction for graduate students or, when used with MATLAB simulation software, the book becomes a virtual laboratory for working professionals who want to improve their understanding of the design process and apply it to the demands of specific situations. This second edition features a large body of new statistical data obtained from simulations and uses available experimental data for confirmation of the simulation results.

With gender as its central focus, this book offers a transnational, multi-faceted understanding of citizenship as legislated, imagined, and exercised since the late eighteenth century. Framed around three crosscutting themes - agency, space and borders - leading scholars demonstrate what historians can bring to the study of citizenship and its evolving relationship with the theory and practice of democracy, and how we can make the concept of citizenship operational for studying past societies and cultures. The essays examine the past interactions of women and men with public authorities, their participation in civic life within various kinds of polities and the meanings they attached to their actions. In analyzing the way gender operated both to promote and to inhibit civic consciousness, action, and practice, this book advances our knowledge about the history of citizenship and the evolution of the modern state.

Acts of vandalism or violence and the defacing of facilities are increasing in public transport systems. This report provides an analysis of the social and psychological causes which is a prerequisite to formulate corrective measures.

"This book offers research articles focused on key issues concerning the technologies and applications of electronic commerce"--Provided by publisher.

This book brings together the research on the effects of disruptive activity in a regulated industry, taking as its illustrative industry that of primarily mobile telecommunications. It provides case studies of both individual countries and international operators.

"Based on research and practitioner-generated reports, this book focuses on the emergence and growth of mobile telecommunications and mobile commerce around the world"--Provided by publisher.

Black women living in the French empire played a key role in the decolonial movements of the mid-twentieth century. Thinkers and activists, these women lived lives of commitment and risk that landed them in war zones and concentration camps and saw them declared enemies of the state. Annette K. Joseph-Gabriel mines published writings and untapped archives to reveal the anticolonialist endeavors of seven women. Though often overlooked today, Suzanne Césaire, Paulette Nardal, Eugénie Éboué-Tell, Jane Vialle, Andrée Blouin, Aoua Kéita, and Eslanda Robeson took part in a forceful transnational movement. Their activism and thought challenged France's imperial system by shaping forms of citizenship that encouraged multiple cultural and racial identities. Expanding the possibilities of belonging beyond national and even Francophone borders, these women imagined new pan-African and pan-Caribbean identities informed by black feminist intellectual frameworks and practices. The visions they articulated also shifted the idea of citizenship itself, replacing a single form of collective identity and political participation with an expansive plurality of forms of belonging. This publication describes the techniques used for evaluation of transport infrastructure investment in a number of ECMT countries and the effectiveness of such methods, and examines conditions governing their use.

Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

This book is aimed at undergraduate students in education and focuses on aspects of student thinking and learning. The emphasis is on providing a readable text that explores the relationships among theory, research and practice for future educators. The book is divided into two parts. The first part examines views on learning with an emphasis on the work of behaviourist theorists Piaget, Vygotsky and his followers, and information-processing theorists. The second part is entitled 'Understanding Individuals' and includes topics ranging from intelligence and creativity to emotional and spiritual intelligence. The text draws on practical examples to illustrate the key ideas and links are made to other disciplines in teacher preparation programs.

A collected set of congressional documents of the 11th to the 55th Congress, messages of the Presidents of the United States, and correspondence of the State Dept. Many of these pamphlets have been catalogued separately under their respective headings.

International specialists at Round Table 78 compare notes on such vital telematics issues as: the strategies adopted in the sector; forms of standardization called for; productivity gains and the obstacles involved.

The United Nations and Human Rights Ardent Media Selected Readings on Electronic Commerce Technologies: Contemporary Applications Contemporary Applications IGI Global

This Round Table examines research relevant to trends in transport in the coming decade examining the political and economic context, financing, demand and supply and methodological issues.

This Round Table examines the quantitative and qualitative evolution and substitution possibilities for employment in transport.
