This book provides extensive research into the use of augmented reality in the three interconnected and overlapping fields of the tourism industry, museum exhibitions, and cultural heritage. It is written by a virtual team of 50 leading researchers and practitioners from 16 countries around the world. The authors explore the opportunities and challenges of augmented reality applications, their current status and future trends, informal learning and heritage preservation, mixed reality environments and immersive installations, cultural heritage education and tourism promotion, visitors with special needs, and emerging post-COVID-19 museums and heritage sites. *Augmented Reality in Tourism, Museums and Heritage: A New Technology to Inform and Entertain* is essential reading not only for researchers, application developers, educators, museum curators, tourism and cultural heritage promoters, but also for students (both graduates and undergraduates) and anyone who is interested in the efficient and practical use of augmented reality technology.

The book is primarily astronomical and philosophical in content, being concerned with the arguments for and against the motion of the earth. Galileo's discoveries and researches in astronomy -- the phases of Venus, the satellites of Jupiter, and the motion of sunspots -- share the main scenes with his cogent and derisive attacks upon Aristotle and his followers. The discussion of the Second Day contains many of Galileo's fundamental contributions to physics -- inertia, the laws of falling bodies, centrifugal force, and the pendulum -- as well as important historical steps in mathematics toward analytic geometry and calculus. Galileo's explanations, written in the infancy of modern science, can hardly fail to be understood today by both layman and scientist.

Tu mundo immerses the Intro Spanish student in a culturally rich world full of opportunities to discover and explore the powerful connections between themselves and the people and cultures of the Spanish-speaking world. Students dive in to intensive communicative practice, building confidence in their ability to interact in a meaningful way in Spanish with access to a wealth of tools to support and guide their progress, including video chat, interactive online scenarios, and an adaptive diagnostic program. In addition, students are able to create their own sense of community, resulting in a unique individual experience that will evolve organically with each student, sparking their natural curiosity about their world. Tu mundo employs a communicative methodology that focuses on developing all four skills, supported by the best digital learning platform available today: Connect Spanish.

Because Tu mundo was designed with today's students in mind, students are more readily engaged with the content, thanks to their avid use of web-based tools, their innate interest in the cultures of other countries, and their preference for visual presentations and quick access to information. Tu mundo reflects the world in which our students live; where online learning, social networking, texting, instant messaging, mobile devices, tablets, online gaming, and virtual scenarios are an integral part of daily life. What are the pillars of Tu mundo? Our extensive and ongoing research in the Intro Spanish course has led to the creation of Tu mundo, with a strong emphasis on the 5 C's: Communication, Culture, Connections, Comparisons, and Communities. Tu mundo delivers content in a variety of ways in order to ensure consistent course outcomes across all course formats.

1. Improved communication performance & skills: By jumping directly into communicative practice at the beginning of every chapter, students are encouraged to immerse themselves in the experience of active learning, whether in a face-to-face or online classroom. Grammar is presented at the end of each chapter, allowing students to study at home and work through the exercises in Connect Spanish for automatic feedback, coming to class ready to engage in discussion. This emphasis on communication in the classroom makes Tu mundo the most effective communicative program on the market. No other program commits to this methodology like Tu mundo.

2. Creating consistent learning outcomes: Tu mundo offers a powerful adaptive learning system called LearnSmart that allows students to identify grammatical structures and vocabulary words not yet mastered and to receive an individualized study program for mastering them. Students of all experience levels will benefit from using LearnSmart, which includes built-in reporting and a competitive scoreboard. Connect Spanish Voice Board and Blackboard Instant Messenger (BbIM), both powered by Wimba, ensure that students are getting ample practice time no matter where their classes take place.

3. Building community and connections between students: Creating a sense of community in the face-to-face or virtual classroom is a huge part of language learning and something that Tu mundo does implicitly. Whether students collaborate in a physical classroom or in Connect Spanish, they are provided with opportunities to engage in meaningful conversations and collaborative task-based activities. The Amigos sin fronteras, a cast of young Hispanic students that share common interests, are featured throughout the entire program and showcased in the Así somos video segments. Through the Amigos sin fronteras, students are exposed to a friendly model on how to apply what they are learning to another friendly group of students, i.e. their own class. In addition, Tu mundo presents an interactive online environment that applies engaging content and task-based scenarios that enable you to practicing your language skills in a fun, immersive way. Thus, students can practice Spanish in a context that is not only fun but extremely motivating.

4. More Culture and Comparisons coverage: Culture is so often left behind—so Tu mundo offers it throughout the program. Each chapter features a country of focus which doubles as the home country of one of the fifteen amigos. Along with in-chapter cultural sections, every chapter of Tu mundo features a second video segment called Mi país (within Connect), narrated by the amigos themselves, as they share information about their native countries. This window into the lives of the amigos provides a point of comparison for you to describe your own life. The Mundo interactivo scenarios represent a variety of cultural contexts in which you can interact with language and culture in a way that is meaningful to you. *Connect Spanish, including but not limited to the workbook/lab manual, LearnSmart, the video program, and chat tools, is sold separately and does not come automatically with the purchase of the textbook.

Pearl Dewitt, who has been living on her uncle's avocado ranch since her parent's messy divorce, meets and falls in love with an

illegal migrant worker, and is trapped with him when wildfires approach his makeshift forest home.

Michael Savage attacks big government and liberal media bias. The son of immigrants, Savage shows how traditional American freedoms are being destroyed from the outside and undermined from within-not just our own government, but also from alien forces within our own society. Savage argues that if the price of liberty is eternal vigilance, then only a more "savage nation" will enjoy these liberties. Savage's high ratings and the rapid growth of his program prove he is in touch with the concerns of the average American.

There is currently much discourse about generations in the public sphere. A sequence of letters conflates generations and age cohorts born in the last few decades (generation "X", "Y" or "Z") as well as multiple categories are used to describe today's young people as a generation that is distinct from its predecessors. Despite the popularity of generational labels in media, politics, or even academia, the use of generation as a conceptual tool in youth studies has been controversial. This Special Issue allows readers to better understand the key issues regarding the use of generation as a theoretical concept and/or as a social category in the field of youth studies, shedding light on the controversies, trends, and cautions that go through it.

The Parliament of Trees made him the master of all plants. The Parliament of Stones gave him control of the earth on which they grow. And the Parliament of Waves put the waters of the world at his command. With all of this power flowing through his veins, the elemental being known as the Swamp Thing has become like unto a god. And, just like many of the gods that preceded him, he has grown wrathful in his judgment of mankind's sins. Now, as he undergoes a final, terrifying trial in the purifying fire of the Parliament of Flames, the creature who was once Alec Holland holds the future of humanity in his cold, mossy hands. And while the Swamp Thing's ties to his human side continue to weaken, dark forces are maneuvering to claim his power for their own. In the end, enemies and allies alike-including his estranged wife Abby and the master magician John Constantine-must make a last-ditch appeal to the man within the monster. If they fail, the choice is stark: kill the Swamp Thing before he completes his trial, or perish along with the rest of Homo sapiens. In SWAMP THING: TRIAL BY FIRE, comics superstar Mark Millar concludes his triumphant run on the legendary VERTIGO series with a powerhouse performance illuminated by art from Phil Hester, Kim DeMulder and Curt Swan. Collects issues #161-171.

In the loveless household of General Sir Frederick and Lady Emily Osmund and their empty-headed twin daughters, begrudgingly adopted niece Azalea is little more than a wallflower. And all because her kind, heroic and beloved father died in a manner they wrongly consider scandalous - and because her mother was Russian! When the General is posted to Hong Kong, Azalea is thrilled but there, as always, she is cast aside and abused. Only the handsome, dashing but imperious Lord Sheldon shows any interest in her - until to her aunt and uncle's disgust she's befriended by a kind Chinese family. But her joy at learning of their culture and customs is short-lived. Kidnapped by pirates, she faces death and worse. Is there any hope now that she'll find true love and a life of her own ?

The woods were insane in the dark, terrifying and magical at the same time. But best of all were the stars, which trumpeted their light into the misty dark. Castella Cresswell and her five siblings???Hannan, Casper, Mortimer, Delvive, and Jerusalem??? know what it's like to be different. For years, their world has been confined to their ramshackle family home deep in the woods of upstate New York. They abide by the strict rule of God, whose messages come directly from their father. Slowly, Castley and her siblings start to test the boundaries of the laws that bind them. But, at school, they're still the freaks they've always been to the outside world. Marked by their plain clothing. Unexplained bruising. Utter

isolation from their classmates. That is, until Castley is forced to partner with the totally irritating, totally normal George Gray, who offers her a glimpse of a life filled with freedom and choice. Castley's world rapidly expands beyond the woods she knows so well and the beliefs she once thought were the only truths. There is a future waiting for her if she can escape her father's grasp, but Castley refuses to leave her siblings behind. Just as she begins to form a plan, her father makes a chilling announcement: the Cresswells will soon return to their home in heaven. With time running out on all of their lives, Castley must expose the depth of her father's lies. The forest has buried the truth in darkness for far too long. Castley might be their last hope for salvation.

Praise for Victor Hernández Cruz: "Bilingual since childhood, Mr. Cruz writes poems about his native Puerto Rico and elsewhere which often speak to us with a forked tongue, sometimes in a highly literate Spanglish. . . . He's a funny, hard-edged poet, declining always into mother wit and pathos." —The New York Times Book Review "A fluent sensualist and rhythmic stylist." —The Washington Post "Like a salsa band leader coaxing and challenging dancers to more and more complex steps, Cruz dares readers with dizzying polyrhythms, polymetric stanzas, backstepping word structures and a sense of improvisation." —Publishers Weekly Beneath the Spanish tracks the way that languages intersect and inform each other, and how language and music shapes experience. Moving across landscapes from Puerto Rico to Manhattan to Morocco, these poems are one man's history and a song that begs to be performed. From "Ay Bendito, Que Vaina": Cuneiform tablet inside, The maracas pencil orality of remembered places, the night stars, the hammock, yucayeques like beehives, a river crab came to my feet to talk with its mouth legs, trembling like castanets. Victor Hernández Cruz is the author of several collections of poetry including, most recently, *The Mountain in the Sea* and *In the Shadow of Al-Andalus*. Featured in Bill Moyers's *Language of Life* series, Cruz's collection, *Maraca*, was a finalist for the Lenore Marshall and Griffin Poetry Prizes. He divides his time between Morocco and his native Puerto Rico.

The War of the End of the World is one of the great modern historical novels. Inspired by a real episode in Brazilian history, Mario Vargas Llosa tells the story of an apocalyptic movement, led by a mysterious prophet, in which prostitutes, beggars and bandits establish Canudos, a new republic, a libertarian paradise.

Original essays and glorious photography, stunningly designed in this unique moviebook from the director of *Monsoon Wedding* and *Vanity Fair*—a Fox Searchlight release. In her essay "Writing and Film," the Pulitzer Prize-winning novelist Jhumpa Lahiri writes about the experience of seeing her novel "transposed" from paper to film. "Its essence remains, but it inhabits a different realm and must, like a transposed piece of music, conform to a different set of rules. . . . To have someone as devoted and as gifted as Mira reinvent my novel . . . has been a humbling and thrilling passage." Mira Nair's essay, "Photographs as Inspiration," begins with the provocative comment: "If it weren't for photography, I wouldn't be a filmmaker." She explains how photographs help her crystallize the visual style of her films and which particular photos influenced her vision for *The Namesake*. These two essays, written exclusively for this Newmarket Pictorial Moviebook, introduce an amazing panoply of images of people and places shot mainly in New York and Calcutta during the making of the movie, accented by excerpts from Lahiri's bestselling novel. Six Indian and American photographers' works are represented. Brilliantly illuminating the immigrant experience and the tangled ties between generations, *The Namesake* tells the story of the Ganguli family, whose move from Calcutta to New York evokes a lifelong balancing act to adapt to a new world while remembering the old. The couple's firstborn, Gogol, and sister Sonia grow up amid these divided loyalties, struggling to find their own identity without losing their heritage. Kal Penn (*Harold & Kumar Go to White Castle*, *Superman Returns*) stars as Gogol.

This book is open access under a CC-BY license. The multiple purposes of nature – livelihood for communities, revenues for states, commodities for companies, and biodiversity for conservationists – have turned environmental governance in Latin America into a highly

contested arena. In such a resource-rich region, unequal power relations, conflicting priorities, and trade-offs among multiple goals have led to a myriad of contrasting initiatives that are reshaping social relations and rural territories. This edited collection addresses these tensions by unpacking environmental governance as a complex process of formulating and contesting values, procedures and practices shaping the access, control and use of natural resources. Contributors from various fields address the challenges, limitations, and possibilities for a more sustainable, equal, and fair development. In this book, environmental governance is seen as an overarching concept defining the dynamic and multi-layered repertoire of society-nature interactions, where images of nature and discourses on the use of natural resources are mediated by contextual processes at multiple scales.

This volume surveys 150 law books of fundamental importance in the history of Western legal literature and culture. The entries are organized in three sections: the first dealing with the transitional period of fifteenth-century editions of medieval authorities, the second spanning the early modern period from the sixteenth to the eighteenth century, and the third focusing on the nineteenth and twentieth centuries. The contributors are scholars from all over the world. Each 'old book' is analyzed by a recognized specialist in the specific field of interest. Individual entries give a short biography of the author and discuss the significance of the works in the time and setting of their publication, and in their broader influence on the development of law worldwide. Introductory essays explore the development of Western legal traditions, especially the influence of the English common law, and of Roman and canon law on legal writers, and the borrowings and interaction between them. The book goes beyond the study of institutions and traditions of individual countries to chart a broader perspective on the transmission of legal concepts across legal, political, and geographical boundaries. Examining the branches of this genealogical tree of books makes clear their pervasive influence on modern legal systems, including attempts at rationalizing custom or creating new hybrid systems by transplanting Western legal concepts into other jurisdictions.

What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

Projects that bring the 'hard' sciences into art are increasingly being exhibited in galleries and museums across the world. In a surge of publications on the subject, few focus on regions beyond Europe and the Anglophone world. *Decolonizing Science in Latin American Art* assembles a new corpus of art-science projects by Latin American artists, ranging from big-budget collaborations with NASA and MIT to homegrown experiments in artists' kitchens. While they draw on recent scientific research, these art projects also 'decolonize' science. If increasing knowledge of the natural world has often gone hand-in-hand with our objectification and exploitation of it, the artists studied here emphasize the subjectivity and intelligence of other species, staging new forms of collaboration and co-creativity beyond the human. They design technologies that work with organic processes to promote the health of ecosystems, and seek alternatives to the logics of extractivism and monoculture farming that have caused extensive ecological damage in Latin America. They develop do-it-yourself, open-source, commons-based practices for sharing creative and intellectual property. They establish critical dialogues between Western science and indigenous thought, reconnecting a disembedded, abstracted form of knowledge with the cultural, social, spiritual, and ethical spheres of experience from which it has often been excluded. *Decolonizing Science in Latin American Art* interrogates how artistic practices may communicate, extend, supplement, and challenge scientific ideas. At the same time, it explores broader questions in the field of art, including the relationship between knowledge, care, and curation; nonhuman agency; art and utility; and changing approaches to participation. It also highlights important contributions by Latin American thinkers to themes of global significance, including the Anthropocene, climate change and environmental justice.

Written in 1995, this unique ethnographic study of a small Idaho community with a large Hispanic population examines many dimensions of the impact race relations have on everyday life for rural Mexican Americans. Mexican Americans are the largest minority in Idaho, yet they live in a different world from the Anglo population, and because of pervasive stereotypes and exclusive policies, their participation in the community's social, economic, and political life is continually impeded. The small-town setting of this study allows the reader to listen to how Anglos talk about a racial minority. Most Americans publicly censor and monitor their thoughts on racial minorities, but Anglos in Midwest expressed openly what many Anglo Americans think. This study presents a comprehensive examination of how institutionalized racism operates in American society. Reading this book will enable the reader to better understand why the race problem in America does not disappear.

Madeleine L'Engle's ground-breaking science fiction and fantasy classic, now a major motion picture. It was a dark and stormy night; Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who

disappeared while engaged in secret work for the government on the tesseract problem. A Wrinkle in Time is the winner of the 1963 Newbery Medal. It is the first book in The Time Quintet, which consists of A Wrinkle in Time, A Wind in the Door, A Swiftly Tilting Planet, Many Waters, and An Acceptable Time. A Wrinkle in Time is now a movie from Disney, directed by Ava DuVernay, starring Storm Reid, Oprah Winfrey, Reese Witherspoon and Mindy Kaling. This title has Common Core connections.
