This best-selling comprehensive book conveys the relevance of sociology by presenting a timely collection of theories, research, and examples -- including its signature first-person accounts that open many chapters. These lived experiences are relevant to students and introduce themes that provide a framework for learning the chapter material. Kendall's vivid and inviting writing style, emphasis on applications, and eye for compelling current examples further highlight sociology's relevance to all students. Now in its eleventh edition, *SOCIOLOGY IN OUR TIMES* is acclaimed for being the first textbook to integrate race, class, and gender issues, and for its thorough presentation of sociological theory, including contemporary perspectives such as feminism and postmodernism. This edition focuses more on social/global change and on the contemporary world, presenting such current debates as bullying and social media abuse, digital-age methods to increase school attendance, food trucks and the spread of culture, modern slavery, and weight bias. Introduction to Probability Models, Tenth Edition, provides an introduction to elementary probability theory and stochastic processes. There are two approaches to the study of probability theory. One is heuristic and nonrigorous, and attempts to develop in students an intuitive feel for the subject that enables him or her to think probabilistically. The other approach attempts a rigorous development of probability by using the tools of measure theory. The first approach is employed in this text. The book begins by introducing basic concepts of probability theory, such as the random variable, conditional probability, and conditional expectation. This is followed by discussions of stochastic processes, including Markov chains and Poisson processes. The remaining chapters cover queuing, reliability theory, Brownian motion, and simulation. Many examples are worked out throughout the text, along with exercises to be solved by students. This book will be particularly useful to those interested in learning how probability theory can be applied to the study of phenomena in fields such as engineering, computer science, management science, the physical and social sciences, and operations research. Ideally, this text would be used in a one-year course in probability models, or a one-semester course in introductory probability theory or a course in elementary stochastic processes. New to this Edition: 65% new chapter material including coverage of finite capacity queues, insurance risk models and Markov chains Contains compulsory material for new Exam 3 of the Society of Actuaries containing several sections in the new exams Updated data, and a list of commonly used notations and equations, a robust ancillary package, including a ISM, SSM, and test bank Includes SPSS PASW Modeler and SAS JMP software packages which are widely used in the field Hallmark features: Superior writing style Excellent exercises and examples covering the wide breadth of coverage of probability topics Real-world applications in engineering, science, business and economics

As if things aren't bad enough in Penns River, development and funding of a new religious-themed mall grinds to a halt when heavily-armed assassins cut down five leaders of the town's fledgling drug trade while eating lunch in the food court. The television minister behind the mall has associates not normally associated with a ministry, outside drug gangs may be muscling into town, and the local mob boss could have an angle of his own. The cops have this and all the usual local activity to contend with in a story that extends beyond the borders of Penns River. Praise for RESURRECTION MALL... "Dana King's Resurrection Mall is a patchwork of desperation from a depressed river town written with

genuine style and grit.” —Reed Farrel Coleman, New York Times bestselling author of *What You Break* “Another thoughtful, taut, suspense filled novel from one of America’s best new writers, the great Dana King.” —Adrian McKinty, author of the Sean Duffy trilogies “*Resurrection Mall* is a brilliant crime novel that deserves to win every award in sight. One of the best of the year.” —Tim Hallinan, author of the *Poke Rafferty*, *Junior Bender*, and *Simeon Grist* mystery series. “Dana King’s *Resurrection Mall* draws you in from the beginning, like sipping a fine single malt that opens wonderfully in the glass and you have to keep sipping until the end. King has a skillful grasp on character and dialogue, and that, along with his rock-solid police procedure, makes for a gripping, authentic read. I am a big fan of the *Penns River* series, and I want more.” —David Swinson, author of *The Second Girl*. “Along with *Worst Enemies* and *Grind Joint*, *Resurrection Mall* elevates Dana King’s masterful *Penns River* crime series into the best hard-nosed police procedural since TV’s *The Wire*. Fun, gripping and thought-provoking, this third entry firmly plants ace Detective Ben ‘Doc’ Dougherty in the ring with heavyweight crime-stoppers Elvis Cole, Alex Cross and Jack Reacher. All of King’s characters burst with no-nonsense, rural Pennsylvania life, but the author dives deepest into the most realistic and engaging crew of municipal cops I’ve encountered since Joseph Wambaugh. Don’t miss it!” —Jack Getze, author and Fiction Editor for *Spinetingler Magazine*. “Complex characters, smooth dialogue and a hell of a plot make this one a winner. Rest easy, Ross Macdonald. The torch has been passed.” —Terrence McCauley, author of *Sympathy for the Devil* and *A Murder of Crows*.
Discusses how to maintain or enhance all PC-compatible systems and explains system assessment, hardware installation, and troubleshooting

"THE BOOK CHINA DOESN'T WANT YOU TO READ."—CNN? A riveting insider's story of how the Party and big money work in China today, by a man who, with his wife, Whitney Duan, rose to the zenith of power and wealth—and then fell out of favor. She was disappeared four years ago. News of this book led to a phone call from Whitney, proof that she's alive. As Desmond Shum was growing up impoverished in China, he vowed his life would be different. Through hard work and sheer tenacity he earned an American college degree and returned to his native country to establish himself in business. There, he met his future wife, the highly intelligent and equally ambitious Whitney Duan who was determined to make her mark within China's male-dominated society. Whitney and Desmond formed an effective team and, aided by relationships they formed with top members of China's Communist Party, the so-called red aristocracy, he vaulted into China's billionaire class. Soon they were developing the massive air cargo facility at Beijing International Airport, and

they followed that feat with the creation of one of Beijing's premier hotels. They were dazzlingly successful, traveling in private jets, funding multi-million-dollar buildings and endowments, and purchasing expensive homes, vehicles, and art. But in 2017, their fates diverged irrevocably when Desmond, while residing overseas with his son, learned that his now ex-wife Whitney had vanished along with three coworkers. This is both Desmond's story and Whitney's, because she has not been able to tell it herself.
