In our digital world, integrated circuits are present in nearly every moment of our daily life. Even when using the coffee machine in the morning, or driving our car to work, we interact with integrated circuits. The increasing spread of information technology in virtually all areas of life in the industrialized world offers a broad range of attack vectors. So far, mainly software-based attacks have been considered and investigated, while hardware-based attacks have attracted comparatively little interest. The design and production process of integrated circuits is mostly decentralized due to financial and logistical reasons. Therefore, a high level of trust has to be established between the parties involved in the hardware development lifecycle. During the complex production chain, malicious attackers can insert non-specified functionality by exploiting untrusted processes and backdoors. This work deals with the ways in which such hidden, non-specified functionality can be introduced into hardware systems. After briefly outlining the development and production process of hardware systems, we systematically describe a new type of threat, the hardware Trojan. We provide a historical overview of the development of research activities in this field to show the growing interest of international research in this topic. Current work is considered in more detail. We discuss the components that make up a hardware Trojan as well as the parameters that are relevant for an attack. Furthermore, we describe current approaches for detecting, localizing, and avoiding hardware Trojans to combat them effectively. Moreover, this work develops a comprehensive taxonomy of countermeasures and explains in detail how specific problems are solved. In a final step, we provide an overview of related work and offer an outlook on further research in this field.

Geoffrey Bennington sets out here to write a systematic account of the thought of Jacques Derrida. Responding to Bennington's text at every turn is Derrida's own excerpts from his life and thought that, appearing at the bottom of each page, resist circumscription. Together these texts, as a dialogue and a contest, constitute a remarkably in-depth, critical introduction to one of the leading philosophers of the twentieth century and, at the same time, demonstrate the illusions inherent in such a project.

Bennington's account of Derrida, broader in scope than any previously done, leads the reader through the philosopher's familiar yet still widely misunderstood work on language and writing to the less familiar and altogether more mysterious themes of signature, sexual difference, law, and affirmation. Seeking to escape this systematic rendering - in fact, to prove it impossible - Derrida interweaves Bennington's text with surprising and disruptive "periphrases": reflections on his mother's death agony, commentaries on St. Augustine's Confessions, memories of childhood, remarks on Judaism, and references to his collaborator's efforts. This extraordinary book offers, on the one hand, a clear and compelling account of one of the most difficult and important contemporary thinkers and, on the other, one of that thinker's strangest and most unexpected texts. Far from putting an end to the need to discuss Derrida, Bennington's text might have originally intended or pretended, this dual text opens new dimensions in the philosopher's thought and work and extends its challenge.

“THE MOST IMPORTANT THING WE CAN GIVE OUR CHILDREN IS AN EDUCATION.” —Mae Bertha Carter In 1965, the Carters, an African American sharecropping family with thirteen children, took public officials at their word when they were offered “Freedom of Choice” to send their children to any school they wished, and so began their unforeseen struggle to desegregate the schools of Sunflower County, Mississippi. In this true account from the front lines of the civil rights movement, four generations of the Carter family speak to author and civil rights activist Constance Curry, who lived this story alongside the family—a story of clear-eyed determination, extraordinary grit, and sweet triumph. “Dignity . . . is a quality displayed in abundance by the heroes of this tale . . . Mae Bertha cut a path for her children. Now it is their turn, and their children's turn.” —The New York Times “Alternately inspiring and mortifying, frightening and enraging . . . Silver Rights is a sure-to-be-classic account of 1960s desegregation.” —Los Angeles Times “A ‘case study’ of moral leadership . . . [An] instructive, even revelatory book.” —Robert Coles, author of Children of Crisis “The book has an immediacy, intimacy and emotional truth that history rarely reveals. It also unfolds with a simplicity of words and facts that make the Carters' courage, faith and love a reality any reader can share.” —Smithsonian “A solid contribution to the literature of recent American political history.” —Kirkus Reviews “Silver Rights is pure gold . . . Connie Curry shines a light on the civil rights movement’s unknown makers . . . A must-read.” —Julian Bond A LITERARY GUILD SELECTION Pictures and text celebrate girls from around the world.

This book, which originated from the broadly held view that there is a lack of Rule-of-law in Mexico, and from the emphasis of traditional academia on cultural elements as the main explanation, explores the question of whether there is any relationship between the system of constitutional review ? and thus the ‘law’ as such ? and the level of Rule-of-law in a given state. To do so, it elaborates a theoretical model for achieving Rule-of-law and compares it to the constitutional review systems of the United States, the Federal Republic of Germany, and Mexico. The study concludes that the two former states correspond to the model, while the latter does not. This is fundamentally due to the role each legal system assigns to ordinary jurisdiction in carrying out constitutional review. Whereas the US and Germany have fostered the policy that constitutional review regarding the enforcement of basic rights is the responsibility of ordinary courts, Mexico has relied too heavily on the specialized constitutional jurisdiction.

Mendoza the Jew combines a graphic history with primary documentation and contextual information to explore issues of nationalism, identity, culture, and historical methodology through the life story of Daniel Mendoza. Mendoza was a poor Sephardic Jew from East London who became the boxing champion of Britain in 1789. As a Jew with limited means and a foreign-sounding name, Mendoza was an unlikely symbol of what many Britons considered to be their very own "national" sport.
