Every spring, the University of Massachusetts - Amherst welcomes all "Soils Conference" Scientific Advisory Board members with open arms as we begin the planning process responsible for bringing you quality conferences year after year. With this "homecoming" of sorts comes the promise of reaching across the table and interacting with a wide spectrum of stakeholders, each of them bringing their unique perspective in support of a successful Conference in the fall. This year marks the 20<sup>th</sup> anniversary of what started as a couple of thoughtful scientists interested in developing partnerships that together could fuel the environmental cleanup dialogue. Since the passage of the Superfund Law, regulators, academia and industry have come to realize that models that depend exclusively on "command and control" mandates as the operative underpinning limit our collective ability to bring hazardous waste sites to productive re-use. It is with this concern in mind that the Massachusetts Department of Environmental Protection privatized its cleanup program in 1993, spurring the close-out of over 20,000 sites and spills across the Commonwealth to date, in a manner that is both protective of human health and the environment while also flexible and responsive to varied site uses and redevelopment goals. So we gather together again, this year, to hear our collective stories and share success and challenges just as we share stories at a family gathering. Take a read through the stories contained in these proceedings. Foreword. Nature and scope. Overview of the planning process. Steps in land-use planning. Methods and sources.

Daily Handwriting Practice, Traditional Cursive is more than just a handwriting book; it is a learning tool that helps developing young minds practice basic skills in an interesting and unique way. For example, on the topic What Is Work? students learn about simple tools and the physics applied in using them. Students write letters, words, and sentences about a variety of content-area topics appropriate for the classroom. Monday through Thursday, the weekly subjects for writing exercises range from famous inventors to famous quotations and from amazing hunters to the water cycle. On Friday, a full-page exercise draws the topic to a close by reviewing what was learned earlier that week. This book is a useful and effective teaching tool because each letter is introduced and practiced before students are asked to use it.

Curriculum topics addressed include: the alphabet capital letters rhyming words months of the year days of the week world alphabets geography facts synonyms nonsense rhymes color words alliteration U.S. presidents simple machines math rhyming words prefixes and suffixes Skills reinforced that help keep handwriting legible include: correct letter formation letter

placement spacing between letters spacing between words
