Requirements focuses on physically demanding occupations that require strength and stamina, such as law enforcement, structural and wildland firefighting, mining, forestry, and the military. It is the first book to examine the relationship of recruitment practices, physical training, and physical evaluation to the intricate environment of corporations, labor organizations, the legal system, and employment rights. Hard Work assists readers in making intelligent and informed decisions resulting in a safer, healthier, and more productive work force. The legal aspects of employment are also considered, including reference to age, gender, race, and disability. Part II examines the value of initial and periodic evaluations, the test development process, and issues related to testing. Additionally, part II contains an examination of the effects of court decisions and labor unions on the evaluation processes of both new and incumbent employees. Part III discusses implementation of recruit testing designed to determine those individuals who can and cannot perform the job. The inherent challenges in shifting from recruit testing to periodic tests for incumbents are described, and ways to evaluate the costs and benefits of testing and training programs are examined. In part IV, the values and limits of medical examinations and employee wellness programs are considered. Part IV also discusses work physiology and its relationship to performance and presents the job-related physical fitness program as the essential element required for preserving career-long performance and health. Part V discusses employee performance in extreme environments, respiratory protection devices and their impact on the worker, and guidelines designed to reduce the risk of back injuries.
