The Editors and the University of Houston Law Center are honored to collaborate with the American Arbitration Association (AAA) and its international division, the International Centre for Dispute Resolution (ICDR), to continue the tradition of publishing an annual survey of important developments in arbitration and the law. The AAA Yearbook on Arbitration and the Law provides arbitrators and busy practitioners a practical, relevant and readily accessible resource. The 24th Edition is organized into three parts: Part One contains digests of important decisions of the United States Supreme Court, the United States courts of appeals and state supreme courts. This volume includes digests of selected judicial decisions from 2007 through 2010, and is current through October 1, 2011. The book contains 176 case digests, together with citations and descriptive cross-references to more than 690 related decisions. We have arranged the case digests under the stages of the entire arbitration process - from the formation of the arbitration agreement to the challenge or enforcement of the arbitral award. Recognizing the important role of arbitration in the global economy, there is a separate chapter containing digests and cross-references to cases dealing with the unique issues presented in international arbitrations. Part Two, an entirely new feature, contains 100 digests of judicial opinions since January 2000 that discuss AAA arbitration rules. For ease of reference the cases are arranged in alphabetical order and are listed by the types of AAA Rules - Commercial, Construction, Employment and International - and by individual rule under each category. Thus the reader can quickly identify all the judicial decisions that discuss a particular AAA rule. Part Three includes selected articles addressing some of the hottest topics in domestic and international arbitration. The AAA Yearbook is the preeminent annual yearbook on Arbitration and Dispute Resolution in the United States. It is a required and necessary reference work for all who wish to stay on top of the latest trends, developments, cases and guidelines - accompanied by expert commentary and analysis - in Arbitration and Dispute Resolution.

Unwanted Warriors uncovers the history of Canada's first casualties of the Great War – men who tried to enlist but were deemed “unfit for service.” What impact did military exclusion have on these men? Nic Clarke looks for answers in the service files of 3,400 rejected volunteers and explores the mechanics of the medical examination, the physical and psychological qualities that the authorities believed made a fighting man, and how evaluations changed as the war dragged on. In the process, he exposes the deleterious effects that socially constructed norms about health and fitness had on individual men and Canadian society during the First World War.
