It is no secret that happiness was spread a bit thinly in Claire Rayner's far from easy childhood. She was born in Stepney, East London, in the early thirties during the Depression and was evacuated during the war. She chose nursing as a career, lying about her age in order to enrol as a cadet in the Epsom Cottage Hospital in Surrey, after which she studied at the Royal Northern, winning their gold medal for achievement. Thus began a lifetime's passion for proper medical care for all, a passion that has made her one of Britain's most important and successful campaigners. She is a patron of more than sixty social and charitable organisations. But it is as advice columnist extraordinaire that she is most famous. A career that began in 1963 on *Hers* magazine was followed by columns in *The Sun* and later the *Sunday Mirror*. At one point she was receiving 1000 letters a week. Working from home, with six secretaries, she read every single letter that came to her.

In the late 1970s we ventured across the country from northern California to western Pennsylvania and back through Washington and Oregon in Steven's boxy old 1965 Chevy van. Those were the days, my friends. That trip had a lasting effect and over time we realized we were destined to be full time RVers. In 1995 we sold our house and a Recreational Vehicle became our home. An RV has been our home every since.

"On a tiny French island, a couple of American dreamers redefine their lives by restoring a ruin...The French House moves to a soulful, very funny rhythm all its own."-Meryl Streep Don and Mindy Wallace have always been Francophiles, so when they had the opportunity to buy a home on a small French island off the coast of Brittany, they jumped-sight unseen-into a crumbling mess that challenged their finances and their family. But when the Wallaces arrived on the island they found a building in ruin, and it wasn't long before their lives resembled it. Plagued by emergency repairs, a stock market crash, and very exasperated French neighbors, Don and Mindy could have accepted their fate. Instead, they embraced it. Redolent with the beauty and flavors of French country life, The French House is a lively, inspiring, and irresistibly charming memoir. Fans of Under the Tuscan Sun (Frances Mayes), Paris in Love (Eloisa James), and A Year in Provence (Peter Mayle) will be enchanted by this account of a family that rises from the rubble, wins the hearts of a historic village, and finally finds the home they've been seeking off the wild coast of France. What readers are saying about The French House "The French House is engaging and well-written and will make even non-Francophiles yearn for a trip to France." "With hauntingly beautiful descriptions of a tiny French island and its inhabitants, this book will take you to a different place, and might even inspire you to reconsider your life and finally follow your dreams where you and your family can become whole." So when Uncle Tony asks them to drive to Vladivostok for another job, they can't think of a good reason why not. The result is a classic caper across the former Soviet Union in Max, a rusty old VW camper. Knowing little of the language or the geography ahead, they embark on probably the longest commute ever, encountering corrupt officials, film star mechanics and over-friendly gangsters. Far off the tourist trail, they bear witness to the collapse of one nation and the birth of a new one during the free-for-all that was Russia in the nineties.

"Having been born a freeman, and for more than thirty years enjoyed the

blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

This book offers a new framework that facilitates the development of more intelligent systems and methods for data analysis and international information sharing, such as the use of satellite imaging and geospatial data to predict changes in weather conditions and shifts in water levels, and to assess the extent of the forest cover remaining on Earth that is visible from space. It brings together the many aspects of science and technology, as well as formula and analytical

approaches required for more informed decision-making. It also highlights the vital importance of understanding the technological, economic and social dimensions of environmental projects that have short-term results and long-term impacts. It is unique in that it clearly distinguishes between environmental project management (EnvPM) and green project management (GreenPM), and presents an amalgamation of environmental management and project management concepts, using geospatial methods to form an EnvPM concept. The book sets a benchmark for the professionalism with which environmental projects should be planned, executed, monitored, assessed and delivered. While primarily intended for professionals responsible for the management of environmental projects or interested in improving the overall efficiency of such projects, it is also a useful handbook for managers in the private, public and non-for-profit sectors. It is a valuable resource for students at both undergraduate and master's levels and an indispensable guide for anyone wanting to develop their skills in modern project management, environmental management and geospatial techniques. ``We are the first generation to feel the impact of climate change, and the last generation that can do something about it." US President Obama's address to the United Nations on Climate Change and Global warming (2015) hison: This book provides an in-depth, well-researched and science-based approach to applying key project-management and spatial tools and practices in environmental projects.
