The groundbreaking investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: to defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military became mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, The Afghanistan Papers contains startling revelation after revelation from people who played a direct role in the war, from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to make time to meet with him. Secretary of Defense Donald Rumsfeld admitted he had "no visibility into who the bad guys are." His successor, Robert Gates, said: "We didn't know jack shit about al-Qaeda." The Afghanistan Papers is a shocking account that will supercharge a long overdue reckoning over what went wrong and forever change the way the conflict is remembered.

Analyzes a series of public domain documents which demonstrate how the government has misled the public, engaging in deception about the objectives and scope of some of its programs and perpetuating wasteful spending and harmful cover-ups.

The issues in the debates over ratifying the Constitution are fundamental to understanding the American Founding. Reading the words of the Federalists and Antifederalists offers unique insights into the principles of American Government. These insights are frequently lost in textbook accounts. Unfortunately, these works are too difficult for many students today to develop an interest. The vocabulary and length of these documents combine into a perfect storm of discouragement for even highly motivated readers. This hurts our understanding of these issues, and it cripples our ability to engage in the conversation started in 1787. These issues remain relevant and hotly contested. This edition seeks to fulfill two broad goals: 1) to, while still retaining the original words of the authors, make these debates accessible to students who would instead simply read online summaries of the texts and 2) to foster discussions on these vital issues. Each of these 52 documents have been trimmed to a manageable size to make them accessible while still being challenging. Each document also includes a series of questions to foster discussion. This edition brings together a coherent collection of primary source documents, making them ideal for use in advanced high school classes or introductory college courses. The included Document Based Questions will save time for instructors, and the collection as a whole will foster a conversation between readers today and the Founding Fathers of 1787. About the Editor: Charles Martindell teaches high school and college courses in Government and Western Civilization. In 2012, he received a Master of Arts degree in American History and Government from Ashland University, where he was honored with the Chairman's Award for Outstanding Performance. He also serves as an Ashbrook Ambassador with the Ashbrook Center at Ashland University. Many of the activities and assignments for his classes (including a printable PDF of this book) are available at <https://www.teacherspayteachers.com/Store/Primary-Sources>

This handbook will show users how to do legal research in the wider and sometimes confusing world of government documents, and is organized intuitively to help the novice. Because many government documents are available freely online, this book is designed to be used in tandem with Internet resources. It can be used as a quick reference tool to navigate the citation formats and unique government information portals, to aid in understanding the material, to find related non-government resources, and to answer some subject-based questions about the availability of government documents. Appendixes cover often-used document numbers and citations, an explanation of the Freedom of Information Act and how to use it to find government documents, and further information and training resources.--Publisher.

This white paper sets out proposals for a detailed programme of action to repair damage done to the environment in the past, and urges everyone to get involved in helping nature to flourish at all levels - from neighbourhoods to national parks. The plans are directly linked to the groundbreaking research in the National Ecosystem Assessment that showed the strong economic arguments for safeguarding and enhancing the natural environment. They also act on the recommendations of 'Making Space for Nature', a report into the state of England's wildlife sites, led by Professor John

Lawton and published in September 2010, which showed that England's wildlife sites are fragmented and not able to respond to the pressures of climate change and other pressures we put on our land. Key measures proposed include: i) Reconnecting nature with New Nature Improvement Areas (NIAs) with a £7.5 million fund for 12 initial NIAs, biodiversity offsetting, New Local Nature Partnerships with £1 million available this year, phasing out peat, ii) Connecting people and nature for better quality of life with Green Areas Designation, better urban green spaces; more children experiencing nature by learning outdoors, strengthening local public health activities, the new environmental volunteering initiative "Muck in 4 Life" to improve places in towns and countryside for people and nature to enjoy and iii) Capturing and improving the value of nature with a Natural Capital Committee; an annual statement of green accounts for UK Plc, a business-led Task Force to expand the UK business opportunities from new products and services which are good for the economy and nature alike.

Annotation Government documents--forms, brochures, letters, and policy papers--that are difficult to understand create problems both for the public they're intended to help and for government agencies. In this collection, researchers from five universities in the Netherlands survey recurring problems in government documents and offer possible solutions. The contributors are linguists, document designers, and other communication experts who have studied public documents both empirically and from a design point of view. Though the subject is Dutch documents, the text is in English, and the work may be of interest to those investigating government communication in other nations as well as those who produce similar documents in the private sector. This guide breaks down the components of government documents librarianship into manageable, easy to understand parts. Lisa Ennis, a "tried by fire" documents librarian, begins by looking at career opportunities in both Federal Depository Libraries (FDLs) and non-depository libraries with government document collections. She discusses skills and traits; networking and training options; managing and administering people, paperwork, and collections; and both public service and technical service issues. She provides essential background on the GPO and the FDLP, covering the shift to a digital environment and publication of the new Electronic FDL Manual. Ennis's informative coverage is matched by an enthusiastic "can-do" approach that will appeal to any librarian considering or already engaged in government documents work.

This is a review text for students preparing to take the 11th-grade New York State Regents examination. It contains an outline of U.S. history, student's study guide, and practice Regents examinations.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States--which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean--it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts--it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7--it is nevertheless an essential record of one of the most transformational events of modern times.

Document-Based Assessment: The Constitution and New Government Teacher Created Materials

This title was first published in 2001: In this compelling work, Matthew Flinders examines how far alternative forms of accountability have evolved and the extent to which they remedy the current shortcomings of the parliamentary system. Adopting a pluralistic perspective, this exploration of the accountability of the core executive is clearly grounded in research methodology, thus ensuring the book makes a valid, incisive contribution to the literature. Features include: - A detailed study of the location of power and mechanisms of accountability in modern government which challenges the largely prosaic existing literature - Useful summaries of the key tensions and trends within constitutional infrastructure - A new and refreshing approach to the study of central government - Insightful critiques of major governmental policies This intriguing volume will be of interest to undergraduates, post-graduates and lecturers for courses on legislative studies, central government reform, public administration, British politics and research methods.

This book offers the tools teachers need to get started with an innovative approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets Common Core State Standards (grades 7-12). The author provides over 60 primary sources organized into 7 thematic units, each structured around an essential question from U.S. history. As students analyze carefully excerpted documents--speeches by presidents and protesters, Supreme Court cases, political cartoons--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century American. Each unit connects to current events and dynamic classroom activities make history come alive. In addition to the documents themselves, this teaching manual provides: strategies to assess student learning; mini-lectures designed to introduce documents; activities to help students process, display, and integrate their learning; guidance to help teachers create their own units, and more.

Copyright law is a critical issue for authors, librarians, publishers, and information vendors. It is also a complex area, with many shades of gray. Librarians continually need to seek answers to questions ranging from the reproduction of copyrighted works for library users, through the performance of audiovisual works, to the digitization and display of protected works on library websites. This book presents updated versions of the author's copyright columns published in *Against the Grain*, the leading journal in acquisitions librarianship since the late 1990s. It is the first volume in the series *Charleston Insights in Library, Archival, and Information Sciences*. The aim of the *Charleston Insights* series is to focus on important topics in library and information science, presenting the issues in a relatively jargon-free way that is accessible to all types of information professionals, including librarians, publishers, and vendors, and this goal shapes the pragmatic and accessible tone of the book. The volume is presented in question-and-answer format. The questions are real, submitted by librarians, educators, and other information professionals who have attended the author's copyright law workshops and presentations or submitted them to her by e-mail or telephone. The author has selected the questions and answers that have general applicability. She has then arranged them into logical chapters, each prefaced by a short introduction to the topic. Because it is written in an accessible and clear style, readers may want to review the entire work or they can just access particular chapters or even specific questions as they need them. The volume includes an index to facilitate reference use.

This paper sets out the Government's proposals for the reform of Judicial Review. Judicial Review is a critical check on the power of the State, providing an effective mechanism for challenging the decisions of public bodies to ensure that they are lawful. The Government is concerned that the Judicial Review process may in some cases be open to abuse, such as delaying tactics, which add to the costs of public services. This paper sets out reform on three key areas: (i) The time limits within which Judicial Review proceedings must be brought; (ii) The procedure for applying for permission to bring Judicial Review proceedings; (iii) The fees charged in Judicial Review proceedings.
