As the U.S. economy struggles to recover from the worst economic crisis since the Great Depression, citizens across the country are searching for alternative investment vehicles. Many are finding solace in a precious metal that has been a universal measure of wealth since early civilization: gold. Investment brokers and novices alike are reaping the benefits that come with diversifying their investments. Gold's value is determined by a number of factors including the volume of the metal held by prosperous countries, the rarity of the metal as it is refined, and current market trends, such as inflation and the movement of the investment market. In 1910, gold was worth \$20 an ounce; a century later, in 2010, the value of gold reached nearly \$1,120 an ounce. This book discusses where the value of these metals first originated and how they have evolved over the course of human history. You will learn how practical uses of precious metals have directly affected their value over time and how metals like gold and silver are direct indicators of the current state of the economy. Most importantly, you will learn to recognize market trends that pinpoint the risk of inflation and the exodus from stock to precious metals that will often occur as a result. You will learn how to use mutual funds and futures to diversify your portfolio without spreading

yourself too thin. With advice from dozens of financial experts and commodities traders, you will learn how to maximize your return and minimize your risk. If you are looking to diversify your portfolio and protect your investments, *The Complete Guide to Investing in Gold and Precious Metals* is your handbook for making the most from your investment. Gold has fascinated people for millennia. With the purchase of gold coins and silver bars you bring the shiny treasure home. Gold and silver are still by far the most important precious metals for investors, for the jewelry industry and for high-tech companies. It is not without reason that the shiny metals have been used for trading, investment or as reserves for thousands of years. Both precious metals offer many advantages, for example they do not rust and retain their shine and beauty for thousands of years. Gold and silver can be deformed, melted down and cast again and

"Throughout the ages, many things have been used as currency: livestock, grains, spices, shells, beads, and now paper. But only two things have ever been money: gold and silver. When paper money becomes too abundant, and thus loses its value, man always turns back to precious metals. During these times there is always an enormous wealth transfer, and it is within your power to transfer that wealth away from you or toward you." --Michael Maloney, precious metals investment expert and historian; founder and principal, Gold & Silver, Inc. Knowledge is power and nowhere does this hold more truth than in investing. Clearly, investing in silver and gold will help protect your assets in the event of a currency collapse. While many people claim this can't happen, there are just as many signs pointing to it as a serious possibility. If global currency collapse does occur, you will need to have some form of wealth protection in place that not only ensures you are protecting the value of your assets but can also be converted into everyday items you will need. That's why it's best to have something of value to trade and nothing is more valuable than investment gold and silver bullions. Once currency collapses, the majority of your paper investments, including stocks, futures and options and so on and so forth, become virtually useless. This is why you need to make sure that you have plenty of investment gold and silver in your portfolio. In The Great Gold, Silver and Crypto Rush of the 21st Century, Mike Maloney and Jeff Clark show why more wealth will be won and lost than ever before. They explain why the global spread of democracy, financial affluence, changes in laws, the development of the investor mindset, and the coming change in the worldwide monetary system are all conspiring to make this the biggest financial event the world has ever seen. Zero interest rates and massive currency creation have push real estate, stocks, and bonds back into massive bubbles, and now the entire world is in the "everything except gold and silver bubble," But the

forces that threaten the world monetary system are the same forces that will propel gold and silver to unimaginable heights. Yes, the threat has never been bigger, but that means that the opportunity has never been bigger. Since 2001, savvy investors and central banks, preparing for the next financial crisis, have already purchased three times more gold and silver than they did in the entire bull market of the 1970s--and they've gobbled up more than ten times the gold that came out of the ground in the California Gold Rush of 1849. Nothing in history can compare. But don't worry... you haven't missed anything. This is only the beginning... the big rush is yet to come. People will either become richer or poorer. The good news is that it is entirely up to them.

This is a Beginner's Basic Guide to Investing in Gold and Silver. As the dollar loses value, many investors are turning to precious metals, converting at least part of their investment portfolio from cash, equities and other assets into silver and gold in an attempt to preserve the value of their capital. This is why the price of gold has more than doubled since 2007. Similar to gold, silver has long been considered a safe investment, especially to hedge against inflation. Like gold, silver is a precious metal and has been used historically as a currency. It is still relatively rare and its unique properties have allowed it to maintain its value over many thousands of years. This book will help you gain a better understanding of gold and silver bullion.

In recent years, metals have been among the safest and most lucrative investments around, but they are not entirely risk-free. Do you want to build your wealth and secure your financial future? Do you want to ensure that inflation does not eat away at everything that you have worked so hard for? Do you want to own wealth outside of the paper financial system? If your answer to these three questions is yes, then you need to own real money. Not rands, dollars or euros: these are merely fiat currencies. You want to own gold and silver, as without them, your wealth is only worth the value of the ink and the paper on which it is printed. For thousands of years, holders of gold and silver have discovered that both metals are monetary antidotes against global financial chaos caused by debt, fiscal imprudence and ad infinitum money-printing. The proprietor of even a few ounces of gold is not only an investor but an individual with the assurance that their wealth and purchasing power remains preserved. Going for Gold is not an attempt to coerce investors into allocating a portion of their total investment portfolio to precious metals. Rather, it speaks directly to the South African investor and declutters and contextualises the vast amounts of information available about precious metals, providing counsel that the mainstream financial industry has disregarded at best, and suppressed at

worst.

Gold and silver are not “magical investments” that you must own when the world ends (knock on wood). However, gold and silver prices will soar in the next few years, which means that you need to know how to quickly invest in precious metals. As a matter of fact, commodity prices as a whole are in long term bull markets. This is a once-in-a-decade opportunity, so you definitely don't want to miss this gravy train. In this book, I'll teach you how to invest profitably in the gold and silver markets. This book is the best getting-started guide available, so you definitely can't go wrong.

There is absolutely no question that people leave days are looking for alternative investments rather than traditional stock and bonds, because although the economy is steadily (but slowly) improving. More and more people are realizing the old adage of "you should never put all your eggs in one basket" and they're looking for something slightly more tangible. Something they can hold in their hands and feel the texture of and something that they know will always have a market value. Something like silver and gold coins! There are advertisements for gold coin and bullion investment opportunities all over on the Internet, television, newspapers and magazines, and these companies tout gold as the world's greatest investment is after all a "noble metal" scientifically speaking this means that it will not erode or become corrosive however in its most raw and natural form gold can develop a surface tarnish. When exposed to direct or intense sunlight. This tarnish which can be easily polished away is known as

"sunburn gold" and as beautiful and a rock solid investment as gold is it is also very expensive the current price. For one, troy ounce of gold is 1,306.72 and the current price for a 1 ounce gold coin is between 1,327.10 and 1,403.96 US dollars. So for a lot of people investing in gold coins is slightly out of reach. However, silver is a slightly more reasonable choice. A 1 ounce silver coin currently sells for between 23.02 and 28.38 US dollars although the price may seem to be bargain-basement compared to the price of gold in the eyes of the two investors. It looks like an opportunity, because silver is still a finite resource, meaning that it is limited, and eventually the price will increase, although it may take a considerable time for you to see significant return in value based solely on the value of the silver itself. Silver coins often have a significant value to collectors above and beyond, a monetary investment.
