The story of pioneer Daniel Boone's life, told in his voice—a tall tale like no other, startling, funny, poignant, romantic and brawling—set during the American Revolutionary War Here is Daniel Boone as you've never seen him: debut novelist Alix Hawley presents Boone's life, from his childhood in a Quaker colony, through two stints captured by Indians as he attempted to settle Kentucky, the death of a son at the hands of the same Indians and the rescue of a daughter. The prose rivals Hilary Mantel's and Peter Carey's, conveying that sense of being inside the head of a storied historical figure about which much nonsense is spoken while also feeling completely contemporary. Boone was a fabulous hunter and explorer, and a "white Indian," perhaps happiest when he found a place as the captive, adopted son of a chief who was trying to prevent the white settlement of Kentucky. Hawley takes us intimately into the life-and-death survival of people pushing away from security and into Indian lands, despite sense and treaties, just before and into the War of Independence. The love story between Boone and his wife, Rebecca, is rich and tangled, but mostly it's Boone who fascinates, pushing into places where he imagines he can create a new "clean" world, only to find death and trouble and complication. He is a fabulous character, unrivaled in North American literature, and a prime candidate for the tall tale. The storytelling is taut and expert, the descriptions rich and powerful, the prose full of feeling, but Boone is what drives this outstanding debut.

surveyors, and racers alike. This fully illustrated book explains how drones developed, where they're going, and which one you should choose. It even includes complete instructions to build both a simple drone and a super-fast FPV racer yourself. Whether you're flying indoors or out, buying or building, this book covers everything: Understand the Jargon: Flying has a lot of unfamiliar terminology, but this book will make it easy to master. Business or Pleasure: Every type of multicopter you might want is introduced, including explanations of which is best suited for what role. Get the Best Pictures: This edition includes an extended guide to the tech and composition tricks you can use to make your pictures stand out of the pack. Get the Best Video: A new shot-guide shows you how to get the most engaging aerial video, whatever your drone. Be an FPV Racer: There are complete step-by-step instructions for building your own FPV racer, or a surprisingly cheap wooden drone – both great projects. This is an Extended Second Edition. Following from the worldwide success of the first edition, which has been translated into numerous languages, this edition is not just fully updated to keep pace with the laws and the technology (including gesture controls), it is also new enough to thoroughly cover the fast-growing new sport of FPV drone racing, while still including a comprehensive guide to learning to fly any drone.

This book is written to show that life was not a lot different during this time that it was written and today. Ruth had two husbands, which a lot of people did not know about. Very little is mentioned about her husbands in the Bible. It really is two love stories in one. First as a young woman in the land of Moab she marries a Jewish boy by the name of Mahlon. Then she comes to Israel with her mother-in-law, Naomi after all the men have passed on. There she meets a man twice her age and marries him. He is Boaz. This is a must read part of the book but only after you read all of the book. That is also the way I taught the Bible, read and understand the Old Testament before going on to the New Testament. You will be surprised at the ending if you have never read this book of the Bible.

This volume provides comprehensive and detailed technical protocols on current biosensor and biodetection technologies and examples of their applications and capabilities. Chapters in Biosensors and Biodetection: Methods and Protocols, Volume 1: Optical-Based Detectors, Second Edition chapters focus on direct and indirect optical detectors including surface plasmon resonance, interferometric sensors, charge-coupled device (CCD) based detectors, spectrometry, and many

other cutting-edge optical biosensors technologies. Written in the format of the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, tips on troubleshooting and avoiding known pitfalls, and step-by-step, readily reproducible laboratory protocols. Authoritative and practical, Biosensors and Biodetection: Methods and Protocols, Volume 1: Optical-Based Detectors, Second Edition offers descriptions of major technologies by leading experts in the field in extensive technical detail. The aim of the book is to make biosensors more accessible and understandable to engineers, students, medical professionals, molecular biologists, chemical, and physical science researchers developing biosensor technologies, allowing readers to both understand the technology and to construct similar devices.

Sex, Power and Consent: Youth Culture and the Unwritten Rules draws on the real world stories and experiences of young women and young men - as told in their own words - regarding love, sex, relationships and negotiating consent.

Judicious reference to feminist and sociological theory underpins explicit connections between young people's lived experience and current international debates. Issues surrounding youth sex within popular culture, sexuality education and sexual violence prevention are thoroughly explored. In a clear, incisive and

eminently readable manner, Anastasia Powell develops a compelling framework for understanding the 'unwritten rules' and the gendered power relations in which sexual negotiations take place. Ultimately *Sex, Power and Consent* provides practical strategies for young people, and those working with them, toward the prevention of sexual violence.

In response to a continuing high loss of commercial fishing vessels and crews, the U.S. Congress has mandated development of new safety requirements for the industry. This volume provides a blueprint for an integrated national safety program that responds

realistically to industry conditions, with priority on the most cost-effective alternatives. Fishing Vessel Safety addresses the role of the U.S. Coast Guard and the fishing industry and evaluates such safety measures as vessel inspection and registration, and the training and licensing of fishermen. It explores vessel condition, the role of human behavior, the problem of weather prediction, the high cost of insurance, and more. An exquisite exploration of the dark, self-transformative power of the tarot archetypes from a world-renowned artist and tarot enthusiast This is tarot deck and book that will help you plumb the depths of your soul, expose the powerful even frightening aspects of the human psyche, and teach you to cultivate self-realization. Arthur Taussig, the creator of the Alchemical Visions Tarot, is a renowned artist and polymath: a physicist, photographer, filmmaker, and musician whose artwork has been exhibited in 300 exhibitions worldwide. His complex imagery explores the theme of the Hero's Journey throughout the major and minor arcana and reveals often overlooked psychological implications of many of the tarot archetypes. Each card is presented as a key to cultivating self-awareness and self-realization. While the Alchemical Visions Tarot falls in the tradition of the Waite and Marseilles decks, it moves past preconceived notions of race of and gender. It is a deck that all serious tarot enthusiasts and spiritual seekers will want to explore for themselves.

People in churches today are hungry for a word from God. Preachers need to prepare and deliver sound biblical sermons that connect with their audience in a meaningful way. Whether you are a student new to preaching or a veteran looking to brush up your preaching skills, here is a valuable resource. Good preaching begins with good exegesis. Preaching God's Word walks you through the steps of the "Interpretive Journey" from the biblical text to contemporary application:

- Grasp the text in "Their Town" (what it meant to the original audience).
- Measure the width of the river that separates the biblical context from today.
- Cross the "Principalizing Bridge" by identifying the timeless theological principles.
- Grasp the text in "Our Town."

While the science of solid biblical interpretation is essential to effective preaching, it must be married to the art of contemporary communication in order to bring the message home. Preaching God's Word also shows you how to understand your audience, develop powerful applications, use illustrations well, and deliver the sermon effectively. The concluding chapters discuss the unique preaching challenges presented by the various biblical genres, providing interpretive keys, things to avoid, and numerous examples. "Carter, Duvall, and Hays have given us a basic and worthy manual of how-to's for preaching. Now since Haddon Robinson's classic text has a book taken such a

practical and understandable, step-by-step approach to the sermon.” -Calvin Miller, Professor of Divinity, Beeson Divinity School“In a day when the church-world is lulled into complacency by sermons that are little more than entertaining homilies on good values and fix-it paradigms, here is a guide to proclamation the way it was meant to be...biblical, understandable, and transforming.” -Joseph M. Stowell, Teaching Pastor, Harvest Bible Church; Former President, Moody Bible Institute.

Until just a few years ago, turning a light on and off with a clap was about as clever as technology got. Today, almost anything can be connected to the internet, and with this connection comes the ability to turn your bedroom lights off from another country, tell your thermostat to create a weather-appropriate lighting scheme, and answer the door without ever leaving your armchair. This book introduces you to Alexa, Siri, and every major technology competing to smarten your home and improve your life. You'll learn how to choose between them, how to optimize their function, and how to avoid the pitfalls that cause new adopters to wish they'd never let a computer into their home.

In their formative years, whitetails develop an intimate relationship with their environment. Thereafter, these big game animals resonate in perfect harmony with their specific surroundings. Behavior patterns of timberland, mountain bred, prairie flats and farm country deer vary substantially. Whitetails behave differently depending on where they are hunted. Predominantly, habitat dictates habits and routines in daily activity. Deer patterns become relatively uniform and reasonably predictable in any particular region. Irrespective of where they live, all whitetails become creatures of habit. Dragan Vujic has hunted whitetails extensively in the checkered agricultural belts scattered along both sides of the border

between Canada and the United States. He shares forty years of hunting experience in this informative book. Initially, Dragan examines and explores the common characteristics of farm country deer. Subsequently, he enumerates and analyzes the drivers and motivators of whitetail behavior. Thereafter, having integrated all of the relevant information, the author suggests several effective strategies for harvesting farm country whitetails.

Like sudoku, O'Ekaki (Paint by Numbers) provides an entertaining test of one's logic, using a grid as its playing field. But rather than leaving the player with boxes of numbers, O'Ekaki ends with a flourish: a fun piece of art that seems to magically appear when you've correctly darkened the final square grid. And each puzzle's title is an amusing clue to the picture that will ultimately emerge. The puzzle challenge on several levels, from beginning to expert, all resulting in a sometimes elaborate picture. And every one is designed by the inventor of O'Ekaki himself!

Chance Molloy pursues a crooked senator's daughter aboard an airplane, but their flight is turbulent in more ways than one In the 1940s, air travel is still in its infancy. Seats turn into private sleepers, passengers smoke in flight, and it's no sweat to carry weapons aboard. Chance Molloy, a self-made airline owner, is dealt a blow when his plans to establish a passenger airline in South America are thwarted by a corrupt US senator. At the news, Molloy's brother, a partner in the venture, kills himself. Seeking some kind of justice, Molloy boards Flight 14 from New York to New Mexico with one goal in mind: to get acquainted with the senator's daughter, Janet Lord, a passenger on the plane. But her charms are greater than he anticipates, and Molloy's simple plan quickly becomes complicated. Also on board are three of the senator's henchmen, a corpse disguised as a passenger, and Molloy's stewardess ex-girlfriend. Soon Molloy realizes that this flight will reach a destination he hadn't anticipated.

Place in Nature, a compilation of his public lectures on Darwin's theory of evolution - specifically the controversial idea of the ape ancestry of humans. An energetic supporter of Darwin, Huxley's argues that in order to understand the universe, everyone must know their place in the natural world. The book is divided into three parts, each written with the aim of persuading lay audiences. The first covers earlier human beliefs about exotic animals, especially 'man-like' apes. In Part 2, Huxley suggests that every animal on Earth is related in that all go through developmental stages from an egg, whether the animal is 'a silkworm or a school-boy'. Part 3 involves a discussion of recently discovered Neanderthal bones and compares prehistoric craniums to modern human skulls.
