Beginning in the heady days just after the First Crusade, this volume—the third in the series that began with and —chronicles the contradictions of a world in transition. In *Did Jesus Exist?* historian and Bible expert Bart Ehrman confronts the question, "Did Jesus exist at all?" Ehrman vigorously defends the historical Jesus, identifies the most historically reliable sources for best understanding Jesus' mission and message, and offers a compelling portrait of the person at the heart of the Christian tradition. Known as a master explainer with deep knowledge of the field, Bart Ehrman methodically demolishes both the scholarly and popular "mythicist" arguments against the existence of Jesus. Marshaling evidence from within the Bible and the wider historical record of the ancient world, Ehrman tackles the key issues that surround the mythologies associated with Jesus and the early Christian movement. In *Did Jesus Exist?: The Historical Argument for Jesus of Nazareth*, Ehrman establishes the criterion for any genuine historical investigation and provides a robust defense of the methods required to discover the Jesus of history. Ancient history is fascinating, but it can be difficult to find material that teaches it from a Christian perspective. Even harder is finding a history curriculum that captivates students. But Angela O'Dell's newly revised *The World's Story 1 - The Ancients* does both! Students will learn all about the ancient civilizations of the Middle East, Europe, Africa, Asia, and the Americas from a

strong Biblical perspective. Focuses on History and interweaves a Christian perspective throughout Features an engaging historical narrative First volume in a three-book world history series for upper elementary and junior high students The text covers Biblical history, also educating students about civilizations mentioned in the Bible, including ancient Egypt, ancient Israel, ancient Babylon, ancient Persia, ancient Greece, and ancient Rome, up to the development of the early Church. The Seven Wonders of the Ancient World, and all sorts of mysteries attaching to them, have intrigued people since the second century BCE. Why were these particular creations chosen and when? And why did the ancients want to draw up such a list in the first place? What were the technical and cultural factors involved in the creation and listing of the Wonders? The Seven Wonders still rival many of the phenomenal products of both nature and mankind in their size, majesty, and beauty. Six of them no longer stand, having been destroyed by natural disaster or by human intervention. From the Pyramids at Giza to the Colossus of Rhodes, from the Hanging Gardens of Babylon to the Lighthouse of Alexandria, from the Temple of Ephesus to the Mausoleum at Halicarnassus and the Statue of Zeus at Olympia, the Seven Wonders of the Ancient World have never ceased to fascinate down the ages.

As one of the world's leading glaciologists, Professor Jemma Wadham has devoted her career to the glaciers that cover one-tenth of the Earth's land surface. Today,

however, these 'ice rivers' are in peril. High up in the Alps, Andes and Himalaya, once-indomitable glaciers are retreating; in Antarctica, meanwhile, thinning ice sheets are releasing meltwater to sensitive marine foodwebs, and may be unlocking vast quantities of methane stored deep beneath them. The potential consequences for humanity are almost unfathomable. Jemma's first encounter with a glacier, as a student, sparked her love of these icy landscapes. There is nowhere on Earth she feels more alive. Whether abseiling down crevasses, skidooring across frozen fjords, exploring ice caverns, or dodging polar bears - for a glaciologist, it's all in a day's work. Prompted by an illness that took her to the brink of death and back, in *Ice Rivers* Jemma recalls twenty-five years of expeditions around the globe, revealing why the glaciers mean so much to her - and what they should mean to us. As she guides us from the Alps to the Andes, the importance of the ice to crucial ecosystems and human livelihoods becomes clear - our lives are entwined with these coldest places on the planet. This is a memoir like no other: an eye-witness account by a top scientist at the frontline of the climate crisis, and an impassioned love letter to the glaciers that are her obsession.

'A searingly passionate book' - Bettany Hughes In The Darkening Age, Catherine Nixey tells the little-known – and deeply shocking – story of how a militant religion deliberately tried to extinguish the teachings of the Classical world, ushering in unquestioning adherence to the 'one true faith'. The Roman Empire had been generous in embracing and absorbing new creeds. But with the coming of Christianity, everything changed. This new faith, despite preaching peace, was violent, ruthless and intolerant. And once it became the religion of empire, its zealous adherents set about the destruction of the old gods. Their altars were upturned, their temples demolished and their statues hacked to pieces. Books, including great works of philosophy and science, were consigned to the pyre. It was an annihilation. living and seafaring and the attempts to protect against the threat of invasion from the seas. Seaborne brigands were greatly feared in the ancient world. Pirates not only preyed on merchant ships and fishing craft in the Mediterranean but also wreaked havoc on coastal townstaking men, women, and children to ransom or sell as slaves; raiding treasures; and exacting tribute from fearful town leaders. Responding to the threat of piracy, the Greeks established their primary cities inland for protection and even in their North African and Sicilian outposts they left coastal land uncultivated. Mariners feared pirate ships around every promontory and sought protection from the navies of such states as Rhodes and Crete. The Romans were beset in the time of their early Republic by "Tyrreanean" pirates based in the south of Italy and during the last years of the Empire by the Cilician pirates of Asia Minor. When one great pirate, Sextus Pompeiius, was finally suppressed, rather than being punished he was charged with ridding the seas of his former followers. His attempts failed. Now available in paperback, Ormerod's classic Piracy in the Ancient World brings the treachery of the ancient high seas alive. Drawing on the works of Homer and Thucydides and the historical records that have survived from ancient Greece and Rome, Ormerod reconstructs the dangers of coastal living and seafaring and the attempts to protect against the threat of invasion from the seas. He describes the general nature of early piracy, ancient navigation, and the pirate's routines and tactics.

Provides a narrative history of this sanctuary and city, from its founding to its modern rediscovery, to show more clearly than ever before why Delphi was one of the most important places in the ancient world for so long. Scott covers the whole history and nature of Delphi, from the literary and archaeological evidence surrounding the site, to its rise as a center of worship with a wide variety of religious practices, to the constant appeal of the oracle despite her cryptic prophecies. He describes how Delphi became a contested sacred site for Greeks and Romans and a storehouse for the treasures of rival city-states and foreign kings. He also examines the eventual decline of the site and how its meaning and importance have continued to be reshaped right up to the present. Finally, for the modern visitor to Delphi, he includes a brief guide that highlights key things to see and little-known treasures. --From publisher description.

'A lovely debut from a gifted young author. Violet Moller brings to life the ways in which knowledge reached us from antiquity to the present day in a book that is as delightful as it is readable.' Peter Frankopan, author of *The Silk Roads*

In *The Map of Knowledge* Violet Moller traces the journey taken by the ideas of three of the greatest scientists of antiquity – Euclid, Galen and Ptolemy – through seven cities and over a thousand years. In it, we follow them from sixth-century Alexandria to ninth-century Baghdad, from Muslim Cordoba to Catholic Toledo, from Salerno's medieval medical school to Palermo, capital of Sicily's vibrant mix of cultures, and – finally – to Venice, where that great merchant city's printing presses would enable Euclid's geometry, Ptolemy's system of the stars and Galen's vast body of writings on medicine to spread even more widely. In tracing these fragile strands of knowledge from century to century, from east to west and north to south, Moller also reveals the web of connections between the Islamic world and Christendom, connections that would both preserve and transform astronomy, mathematics and medicine from the early Middle Ages to the Renaissance. Vividly told and with a dazzling cast of characters, *The Map of Knowledge* is an evocative, nuanced and vibrant account of our common intellectual heritage. 'An endlessly fascinating book, rich in detail, capacious and humane in vision.' Stephen Greenblatt, author of *The Swerve: How the World Became Modern*

A lively and engaging narrative history showing the common threads in the cultures that gave birth to our own. This is the first volume in a bold new series that tells the stories of all

peoples, connecting historical events from Europe to the Middle East to the far coast of China, while still giving weight to the characteristics of each country. Susan Wise Bauer provides both sweeping scope and vivid attention to the individual lives that give flesh to abstract assertions about human history. Dozens of maps provide a clear geography of great events, while timelines give the reader an ongoing sense of the passage of years and cultural interconnection. This old-fashioned narrative history employs the methods of “history from beneath”—literature, epic traditions, private letters and accounts—to connect kings and leaders with the lives of those they ruled. The result is an engrossing tapestry of human behavior from which we may draw conclusions about the direction of world events and the causes behind them.

The Epic of Gilgamesh is among the earliest surviving works of literature, with the earliest versions dating from around the Third Dynasty of Ur in early Sumeria (2150-2000 BC). Preserved in Cuneiform, the Epic was retold over the centuries, and the most complete version was discovered in the ruins of the library palace of the seventh century BC Assyrian king, Ashurbanipal. The Epic is most notable as being the obvious source of the biblical story of Noah and the flood. The Epic tells the story of the king of Uruk, Gilgamesh, and his adventures with his erstwhile foe and then friend, Enkidu. Together they journey to the Cedar Mountain to defeat Humbaba, its monstrous guardian, then they kill the Bull of Heaven, which the goddess Ishtar sends to punish Gilgamesh for spurning her

Captain Paul is transporting Lusignan to exile in the West Indies. Little does he know that his mission is a sham. His prisoner is an innocent man, framed because he fell in love with a Count's daughter. Once the truth is revealed, Paul and Lusignan return to France, determined to seek justice. Inspired by the real life of American Revolutionary War hero John Paul Jones, "Captain Paul" is a rollicking melodrama, packed with action and romance. A fine precursor to Dumas' later classics, it's especially recommended for fans of naval adventures, like C.S. Forester's "Hornblower" series. Alexandre Dumas (1802 - 1870) was a hugely popular 19th Century French writer. Born of mixed French and Haitian heritage, Dumas first rose to prominence in Paris as a playwright, but later gained international fame with his historical fiction. Often co-authored with other writers, these stories wove together swashbuckling adventure, romance, and real events from France's past. Among the best known are "The Three Musketeers", and its sequels "Twenty Years After", and "Le Vicomte de Bragelonne: Ten Years Later". Set across four decades, this trilogy follows the rise of the dashing D'Artagnan—from hot-headed soldier to trusted captain under Louis XIV. Dumas' other novels include "The Count of Monte Cristo" and "The Black Tulip". His works have been adapted into more than 200 movies, including The Man in the Iron Mask starring Leonardo DiCaprio.

Cuneiform Texts and the Writing of History discusses how the abundant Mesopotamian cuneiform text sources can be used for the study of various aspects of history: political, social, economic and gender. Marc Van De Mieroop provides a student-friendly introduction to the subject and: * criticises disciplinary methodologies which are often informed by a desire to write a history of events * scrutinises the intellectual background of historical writings * examines how Mesopotamia's position as the 'other' in Classical and Biblical writings has influenced scholarship * illustrates approaches with examples taken from the entirety of Mesopotamian history.
