ESCAPE FROM EARTH is the untold story of the engineers, dreamers and rebels who started the American space programme. In particular, it is the story of Frank Malina, founder of what became Nasa's Jet Propulsion Laboratory and the scientist who cracked the, as he called it, problem of escape from the Earth by rocket. It's a wild ride. Jack Parsons, Malina's chemistry-expert research partner, was a bed-hopping occultist with delusions of grandeur. We get all the horrible details: drug parties and sex magic, cameos by Aleister Crowley and L Ron Hubbard, and an ill-fated attempt to start a mail-order religion. Armed with hitherto unpublished letters, journals, and documents from the Malina family archives, Fraser MacDonald reveals what we didn't know. Jack Parsons betrayed Frank Malina to the FBI, cooperating fully in their investigation of Malina for un-American activities. The Jet Propulsion Lab's second director secretly denounced Frank as a Communist. Frank's research group had close ties to the spy network of the infamous Rosenbergs - the only Americans executed during the Red Scare. This is a story of soaring ideals entangled in the most human of complications: infidelity and divorce, betrayal and treason.

“Toward a Ludic Architecture” is a pioneering publication, architecturally framing play and games as human practices in and of space. Filling the gap in literature, Steffen P. Walz considers game design theory and practice alongside architectural theory and practice, asking: how are play and games architected? What kind of architecture do they produce and in what way does architecture program play and games? What kind of architecture could be produced by playing and gameplaying?

This official book captures the amazing history of Larry Perkins' famous team via the histories of its individual race cars. The book follows on from the sold-out release by the same production house in 2017 documenting the history of every Holden Racing Team race car and the follow up sell-out in 2020 covering the history of all of Dick Johnson

Racing's cars. Perkins Engineering built more than 50 Commodore race cars for both its own racing program and privateer customers as well as more than 200 engines for touring cars, AUSCAR, Formula Holden, road car and boat use. All of these Perkins-built cars will be covered in full including never-before-published insights and photographs to feature and Perkins Engineering's official records used to help compile the ultimate history book. The exciting new release will start with Perkins' first ENZED Commodore Group A VK built in 1986, include the histories of the three Bathurst-winning Castrol Commodores that conquered the Mountain in the 1990s and end with the last Jack Daniel's Commodore VE. It features Commodore models including VK, VL Group A SS, VL Group A SV, VN, VP, VR, VS, VT, VX, VY, VZ and VE and includes all of the iconic Perkins Castrol and Jack Daniel's race cars as well as the wide range of privateer cars built by Perkins Engineering. Each car's racing history is presented in a stunning layout along with a special focus placed on each car's performances in 'The Great Race' at Bathurst. This hardcover book will be produced in an exclusive limited-edition print run and each copy will come individually numbered and hand-signed by Larry Perkins, making it not only an official historic resource but a truly special collectable item. Australian-made and printed in Australia via green printing methods, this book is a must-have for the collection of any Larry Perkins, Perkins Engineering, Holden, Bathurst, motorsport, motoring or automotive enthusiast. Scheduled for release in October/November 2021, this book can't be missed.
