Education began on the most intimate levels: the family and the community. With industrialization, education became professionalized and bureaucratized, typically conducted in schools rather than homes. Over the past half century, however, schooling has increasingly returned home, both in the United States and across the globe. This reflects several trends, including greater affluence and smaller family size leading parents to focus more on child well-being; declining faith in professionals (including educators); and the Internet, whose resources facilitate home education. In the United States, students who are homeschooled for at least part of their childhood outnumber those in charter schools. Yet remarkably little research addresses homeschooling. This book brings together work from 20 researchers, addressing a range of homeschooling topics, including the evolving legal and institutional frameworks behind home education; why some parents make this choice; home education educational environments; special education; and outcomes regarding both academic achievement and political tolerance. In short, this book offers the most up-to-date research to guide policy makers and home educators, a matter of great importance given the agenda of the current presidential administration. The chapters in this book were originally published as articles in the Journal of School Choice.

Taking readers into the rural hinterlands of the rapidly urbanizing societies of the United States, Canada, Great Britain, and the Netherlands, the essays in Women in Agriculture tell the stories of a cadre of professional women who worked as agricultural researchers, producers, marketers, educators, and community organizers, and acted to bridge the growing rift between those who grew food and those who only consumed it.

Throughout the world, teaching is looked at as one of the most respected and noble profession a person could have. A great teacher not only shows the right path that a student should follow but also prepares the human resources for the further development of the nation. Among various exams CTET is the most popular teaching exam in the country. Central Teaching Eligibility Test (CTET) is a national level test conducted by CBSE twice a year to recruit the eligible candidates as teacher. The exam is conducted into 2 papers: Paper 1 for class 1-5 and Paper 2 for class 6-8. Any candidate who is interested to become a teacher for classes 6 to 8 then they have to appear for both the papers. The new the edition of Study Guide 'Success Master CTET Paper – I for (class I – V)' has been prepared completely on the latest exam pattern. The book has been divided into 5 key sections and further divided into chapters providing the focused study material. This is Volume 2 of 2, covering Chapters 24 - 34 and the appendices. See www.textbookequity.org/principles-of-economics Excerpt: Principles of Economics is designed for a two-semester principles of economics sequence. The text has been developed to meet the scope and sequence of most introductory courses. At the same time, the book includes a number of innovative features designed to enhance student learning. Instructors can also customize the book, adapting it to the approach that works best in their classroom. The pedagogical choices, chapter arrangements, and learning objective fulfillment were developed and vetted with feedback from educators dedicated to the project. They thoroughly read the material and offered critical and detailed commentary. The outcome is a balanced approach to micro and macro economics, to both Keynesian and classical views, and to the theory and application of economics concepts. Current events are treated in a politically-balanced way as well.

Recent scholarship on archival research has raised questions concerning the character and impact of 'the archive' on how the traces of the past are researched, the use and analysis of different kinds of archived data, methodological approaches to the practicalities involved, and what kind of theory is drawn on and contributed to by such research. The Archive Project: Archival Research in the Social Sciences builds on these questions, exploring key methodological ideas and debates and engaging in detail with a wide range of archival projects and practices, in order to put to use important theoretical ideas that shed light on the methods involved. Offering an overview of the current 'state of the field' and written by four authors with extensive experience in conducting research in and creating archives around the world, it demonstrates the different ways in which archival methodology, practice and theory can be employed. It also shows how the ideas and approaches detailed in the book can be put into practice by other researchers, working on different kinds of archives and collections. The volume engages with crucial questions, including: What is 'an archive' and how does it come into existence? Why do archival research and how is it done? How can sense be made of the scale and scope of collections and archives? What are the best ways to analyse the traces of the past that remain? What are helpful criteria for evaluating the knowledge claims produced by archival research? What is the importance of community archives? How has the digital turn changed the way in which archival research is carried out? What role is played by the questions that researchers bring into an archive? How do we deal with unexpected encounters in the

archive? A rigorous and accessible examination of the methods and choices that shape research 'on the ground' and the ways in which theory, practice and methodology inform one another, this book will appeal to scholars across the social sciences and humanities with interests in archival and documentary research.

Tourism in Palestine has been receiving an increasingly important profile given its economic and religious importance and the significant role it plays in Israeli-Palestinian relations, representation of Palestinian statehood and identity, and wider Middle Eastern politics. Nevertheless, Palestine, like much of the Middle East as a whole, remains extremely underrepresented in tourism literature. This title aims to fill this void by being the first book dedicated to exploring the significance of tourism in relationship to Palestine. The book examines the role of tourism in Palestine at three main levels. First, it provides an overview of destination management and marketing issues for the tourism industry in Palestine and addresses not only the visitor markets and the economic significance of tourism but also the realities of the difficulties of destination management, marketing and promotion of the Palestinian state. Second, it provides a series chapters and case studies that interrogate not only the various forms of tourism in Palestine but also its economic, social, environmental and spiritual importance. This section also conveys a dimension to tourism in Palestine that is not usually appreciated in the Western mainstream media. The third section indicates the way in which tourism in Palestine highlights broader questions and debates in tourism studies and the way in which travel in the region is framed in wider discourses. A significant dimension of the book is the attention it gives to the different voices of stakeholders in Palestinian tourism at varying levels of scale. This timely volume will offer the reader significant insight into the challenges and issues of tourism in this area now and in the future. It will benefit those interested in tourism, Middle East studies, politics, economics, development studies and geography.

One of the primary topics at the center of discussion, and very often debate, between industry professionals, government officials, and the general public is the current healthcare system and the potential for an overhaul of its processes and services. Many organizations concerned for the long-term care of patients wish to see new strategies, practices, and organizational tools developed to optimize healthcare systems all over the world. One of the central engines of the current shift toward reorientation of healthcare services is virtual and mobile healthcare. Virtual and Mobile Healthcare: Breakthroughs in Research and Practice explores the trends, challenges, and issues related to the emergence of mobile and virtual healthcare. The book also examines how mobile technologies can best be used for the benefit of both doctors and their patients. Highlighting a range of topics such as smart healthcare, electronic health records, and m-health, this publication is an ideal reference source for medical professionals, healthcare administrators, doctors, nurses, practitioners, and researchers in all areas of the medical field.

Now in its third edition, this classic book is widely considered the leading text on Bayesian methods, lauded for its accessible, practical approach to analyzing data and solving research problems. Bayesian Data Analysis, Third Edition continues to take an applied approach to analysis using up-to-date Bayesian methods. The authors—all leaders in the statistics community—introduce basic concepts from a data-analytic perspective before presenting advanced methods. Throughout the text, numerous worked examples drawn from real applications and research emphasize the use of Bayesian inference in practice. New to the Third Edition Four new chapters on nonparametric modeling Coverage of weakly informative priors and boundary-avoiding priors Updated discussion of cross-validation and predictive information criteria Improved convergence monitoring and effective sample size calculations for iterative simulation Presentations of Hamiltonian Monte Carlo, variational Bayes, and expectation propagation New and revised software code The book can be used in three different ways. For undergraduate students, it introduces Bayesian inference starting from first principles. For graduate students, the text presents effective current approaches to Bayesian modeling and computation in statistics and related fields. For researchers, it provides an assortment of Bayesian methods in applied statistics. Additional materials, including data sets used in the examples, solutions to selected exercises, and software instructions, are available on the book's web page.

Incorporating new and updated information, this second edition of THE bestselling text in Bayesian data analysis continues to emphasize practice over theory, describing how to conceptualize, perform, and critique statistical analyses from a Bayesian perspective. Its world-class authors provide guidance on all aspects of Bayesian data analysis and include examples of real statistical analyses, based on their own research, that demonstrate how to solve complicated problems. Changes in the new edition include: Stronger focus on MCMC Revision of the computational advice in Part III New chapters on nonlinear models and decision analysis Several additional applied examples from the authors' recent research Additional chapters on current models for Bayesian data analysis such as nonlinear models, generalized linear mixed models, and more Reorganization of chapters 6 and 7 on model checking and data collection Bayesian computation is currently at a stage where there are many reasonable ways to compute any given posterior distribution. However, the best approach is not always clear ahead of time.

Reflecting this, the new edition offers a more pluralistic presentation, giving advice on performing computations from many perspectives while making clear the importance of being aware that there are different ways to implement any given iterative simulation computation. The new approach, additional examples, and updated information make Bayesian Data Analysis an excellent introductory text and a reference that working scientists will use throughout their professional life.

The last decade has witnessed the rise of the cell phone from a mode of communication to an indispensable multimedia device, and this phenomenon has led to the burgeoning of mobile communication studies in media, cultural studies, and communication departments across the academy. The Routledge Companion to Mobile Media seeks to be the definitive publication for scholars and students interested in comprehending all the various aspects of mobile media. This collection, which gathers together original articles by a global roster of contributors from a variety of disciplines, sets out to contextualize the increasingly convergent areas surrounding social, geosocial, and mobile media discourses. Features include: comprehensive and interdisciplinary models and approaches for analyzing mobile media; wide-ranging case studies that draw from this truly global field, including China, Africa, Southeast Asia, the Middle East, and Latin America, as well as Europe, the UK, and the US; a consideration of mobile media as part of broader media ecologies and histories; chapters setting out the economic and policy underpinnings of mobile media; explorations of the artistic and creative dimensions of mobile media; studies of emerging issues such as ecological sustainability; up-to-date overviews on social and locative media by pioneers in the field. Drawn from a range of theoretical, artistic, and cultural approaches, The Routledge Companion to Mobile Media will serve as a crucial reference text to inform and orient those interested in this quickly expanding and far-reaching field.

An avid gamer and sharp media critic explains meritocracy's negative contribution to video game culture—and what can be done about it Video games have brought entertainment, education, and innovation to millions, but gaming also has its dark sides. From the deep-bred misogyny epitomized by GamerGate to the endemic malice of abusive player communities, gamer culture has had serious real-world repercussions, ranging from death threats to sexist industry practices and racist condemnations. In *The Toxic Meritocracy of Video Games*, new media critic and longtime gamer Christopher A. Paul explains how video games' focus on meritocracy empowers this negative culture. Paul first shows why meritocracy is integral to video-game design, narratives, and values. Games typically valorize skill and technique, and common video-game practices (such as leveling) build meritocratic thinking into the most basic premises. Video games are often assumed to have an even playing field, but they facilitate skill transfer from game to game, allowing certain players a built-in advantage. *The Toxic Meritocracy of Video Games* identifies deep-seated challenges in the culture of video games—but all is not lost. As Paul argues, similarly meritocratic institutions like professional sports and higher education have found powerful remedies to alleviate their own toxic cultures, including active recruiting and strategies that promote values such as contingency, luck, and serendipity. These can be brought to the gamer universe, Paul contends, ultimately fostering a more diverse, accepting, and self-reflective culture that is not only good for gamers but good for video games as well.

New Zealand has to rebuild the majority of its second-largest city after a devastating series of earthquakes – a unique challenge for a developed country in the twenty-first century. The 2010-2011 earthquakes fundamentally disrupted the conventions by which the people of Christchurch lived. The exhausting and exhilarating mix of distress, uncertainty, creativity, opportunities, divergent opinions and competing priorities generates an inevitable question: how do we know if the right decisions are being made? *Once in a Lifetime: City-building after Disaster in Christchurch* offers the first substantial critique of the Government's recovery plan, presents alternative approaches to city-building and archives a vital and extraordinary time. It features photo and written essays from journalists, economists, designers, academics, politicians, artists, publicans and more. *Once in a Lifetime* presents a range of national and international perspectives on city-building and post-disaster urban recovery.

For pathways to be truly sustainable and advance gender equality and the rights and capabilities of women and girls, those whose lives and well-being are at stake must be involved in leading the way. Gender Equality and Sustainable Development calls for policies, investments and initiatives in sustainable development that recognize women's knowledge, agency and decision-making as fundamental. Four key sets of issues - work and industrial production; population and reproduction; food and agriculture, and water, sanitation and energy provide focal lenses through which these challenges are considered. Perspectives from new feminist political ecology and economy are integrated, alongside issues of rights, relations and power. The book untangles the complex interactions between different dimensions of gender relations and of sustainability, and explores how policy and activism can build synergies between them. Finally, this book demonstrates how plural pathways are possible; underpinned

by different narratives about gender and sustainability, and how the choices between these are ultimately political. This timely book will be of great interest to students, scholars, practitioners and policy makers working on gender, sustainable development, development studies and ecological economics.

The level of outward foreign direct investment (OFDI) flows from ASEAN countries has increased rapidly in past two decades. This book examines OFDI trends and patterns in the ASEAN region including the impact of the ASEAN Economic Community. It also provides analyses of country policies affecting OFDI and the drivers of OFDI in Indonesia, Malaysia, Singapore and Vietnam. Myanmar is studied as an investment frontier for other ASEAN countries. "e;The dynamic economies of Southeast Asia have historically been very large recipients of foreign direct investment (FDI). As global capital markets have opened up, and these economies have developed their technological and commercial capabilities, in more recent years Southeast Asia has emerged as a significant source of outward FDI both within the region and beyond. This important volume, by a group of leading regional scholars, offers a timely, comprehensive, accessible and authoritative analysis of this phenomenon."e;-Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Arndt-Corden Department of Economics, Crawford School of Public Policy, Australian National University"e;A timely, rich and comprehensive study filling a major gap in the literature on the increasingly important phenomenon of foreign investment flowing out from regions including developing and middle-income countries."e;-Luke Nottage, Professor of Comparative and Transnational Business Law; Associate Director, Centre for Asian and Pacific Law at the University of Sydney

Ensuring women's economic empowerment and access to and control over resources requires an integrated approach to growth and development, focused on gender-responsive employment promotion and informed by the interdependency between economic and social development. Social objectives need to be incorporated into economic policies. Economic growth strategies should give attention to the real economy and focus on creating a gender-sensitive macroeconomic environment, full employment and decent work, access to land, property and other productive resources as well as financial services, and full coverage of social protection measures. The Survey outlines a number of concrete recommendations in these critical areas, which if adopted, will facilitate women's equitable access to and control over economic and financial resources.
