"Once adjunct teaching was considered a temporary solution to faculty shortages in institutions of higher education. Now it a permanent and indispensable feature of such institutions, not just in the U.S. but worldwide. This book takes stock of this new development, concentrating primarily on the situation in the humanities. It looks at its impact on the lives of the highly-educated scholars and teachers from many parts of the world; scholars waking up to the sobering fact that higher education presents them with a two-tiered labour market in which they themselves are permanently barred from moving up to the higher tier. To them, being an adjunct teacher means experiencing frustration and humiliation. All essays in this book offer

personal accounts of adjuncts' experiences together with critical reflections on institutional conditions and suggestions for their improvement. In turn defiant, poignant, analytical, exasperated, and sardonic, these essays are always incisive and revealing. Their inside view - a view from below - shows higher education as a world different from how it appears to tenured professors and university administrators, different from that presented in most college brochures. For all those who care about the current state and the future of higher education - no matter if they are teachers, scholars, students, parents, or administrators - this book will offer valuable insights into the working world of academic teaching."--BOOK JACKET.

Designing Effective Assessment

This volume, the ninth volume in the Handbook of Research in Middle Level Education, is a compilation of research studies focusing on the use and implementation of common planning time (CPT) in middle level schools. All of the studies were part of the Middle Level Education Research SIG's National Middle Grades Research Project (NMGRP) on Common Planning Time, which provides additional evidence about teachers' understandings, experiences, the benefits and barriers about CPT. Since all researchers participating in the SIG-sponsored project utilized the same data collection protocols and followed the same protocols, the overall data collection was systematic and is highly reliable. Five research questions were generated to guide the development of the data collection protocols. While the authors were encouraged to use their data to address these project-level questions, they were not required to do so. The project consisted of both qualitative and quantitative data collection. Phase I (qualitative) consisted of observations of CPT meetings and structured interviews with teachers. Phase II (quantitative) was comprised of an online teacher survey. Within the chapters of this volume, a variety of relevant and meaningful research questions are examined utilizing both qualitative and quantitative methodologies.

This book about teachers as characters in popular media examines what can be learned from fictional teachers for the purposes of educating real teachers. Its aim is twofold: to examine the constructed figure of the teacher in film, television and text and to apply that examination in the context of teacher education. By exploring the teacher construct, readers are able to consider how popular fiction and film have influenced society's understandings and views of classroom teachers. Organized around four main themes—Identifying with the Teacher Image; Constructing the Teacher with

Content; Imaging the Teacher as Savior; The Teacher Construct as Commentary—the chapters examine the complicated mixture of fact, stereotype and misrepresentation that create the image of the teacher in the public eye today. This examination, in turn, allows teacher educators to use popular culture as curriculum. Using the fictional teacher as a text, preservice—and practicing—teachers can examine positive and negative (and often misleading) representations of teachers in order to develop as teachers themselves.
